STEAM TO ENGLAND.

QUEENSLAND ROYAL MAIL STEAMERS.

The British-India Company, being under postal contract with the Queensland Government for the Conveyance of Mails monthly between Queensland and England, the following magnificent steamships will be despatched from Brisbane for London, via North Queensland ports, Batavia, Aden, and the Suez Canal:—

DORUNDA, 2977 tons, Captain N. R. Sayers, TUESDAY, 11th August.
WISTOW HALL, 2674 tons, TUESDAY, 8th September.
MERKARA, 2971 tons, Captain G. Phillips, TUESDAY, 6th October.

Passengers by this route have the advantage of visiting the Queensland ports, and can leave Sydney by any of the steamers of the Queensland Steam Shipping Company, embarking on board the British-India steamer at Brisbane, Townsville, Cooktown, or Thursday Island.

The magnificent scenery, smooth-water passage, and the frequent opportunities afforded to travellers to break the monotony of a long sea voyage by visiting Batavia and other interesting ports of call, offer great inducements to passengers.

The steamers are fitted with all the latest improvements, and the accommodation and table attendance is unrivalled.

The agents now issue passenger tickets on the following moderate scale:—

Saloon, Sydney to London	£53 0 0
*Second Class	36 10 0
*Third Class	20 0 0
Saloon, return (available for 12 months)	85 0 0

Through passages issued to Padang, Samarang, Sourabaya, Macassar, Singapore, and other ports in the Eastern Archipelago, exchanging at Batavia to the fine steamers of the Netherlands-India S. N. Company.

* Should sufficient inducement offer.

SPRING, 1885.
LADIES' DRESSMAKING DEPARTMENT.—For our movements in this department we have made such exertion as has admitted of no somnolent repose, and for this spring we are prepared to undertake any orders with safety for their execution.

The production of Toilettes and Costumes for this season is sure to tax an energy hitherto unheard of, and with the reports before us of the Continental and London Spring fashions we have prepared for that increased demand for true fashion which this season is bound to bring. The models, designs, fabrics, and everything which can bear the touch of novelty has been subjected to a treatment beyond all praise; and in assuring our patrons of that supervision which will, we feel sure, merit their approbation, we stand confident of an increased patronage in our Dressmaking Department.

FRENCH MODELS, of course, will retain, as they always do, a leading position; for however recherche the London designs may be, they lend a charm to the latest productions of art in this direction.

WE ARE NOW SHOWING our first consignments, and solicit early inspection.

FARMER and COMPANY.

SPRING, 1885.
NEW SPRING SILKS.—The magnificent show we at all times have in this department has been heightened by the introduction of our Spring Novelties; and, judging from what we can at this early date chronicle, the Spring of 1885 will but reflect the greatest credit on the manufacturers of these goods; for beyond all praise are the delicate and beautiful tints produced in these richest of textures for ladies' wear. We shall during this week be making our first show for this season, but can at this moment offer but a preliminary notice of same.

To our numerous patrons we desire to extend our usual invitation of inspection, and to those who cannot personally respond we shall have pleasure in forwarding patterns.

FARMER and COMPANY.

UNDERCLOTHING DEPARTMENT.
We are offering in this department some special value. Our prices will be found to eclipse the best effort to produce by any home-made labour, whilst for shape and style no home-made garments can compare. We ask inspection of the following:—
Ladies' hand-made Drawers, 2s 6d to 10s 6d
Ladies' hand-made Chemises, 3s to 7s 6d
Ladies' hand-made Nightgowns, 4s 9d to 12s 6d
Ladies' machine-made Drawers, 2s to 8s 6d
Ladies' machine-made Chemises, 3s 3d to 12s 6d
Infants' Layettes, from 5 to 30 guineas.
Nursery Baskets, in great variety, on stands, elegantly trimmed, from 39s 6d to 50s
Ladies' Corsets, steel back, 5s 6d; Thomson's Glove-fitting, 10s 6d; Acme, 10s 6d
Ladies' and Children's Shoulder Braces, &c.
Flannel and Cashmere Wrappers, trimmed lace and satin
Some very handsome Teagowns, Irish poplin, trimmed lace and satin, also black satin trimmed lace and coloured embroidery.

FARMER and COMPANY.

GLOVE DEPARTMENT.
FOR THE SPRING SEASON
In this Department we are showing a grand variety of SILK GLOVES. These will be exceedingly fashionable, and will be worn to match the materials comprising the Costume.

Farmer's Victoria—2 buttons, 4s 6d; 4 buttons, 5s 6d; 6 buttons, 6s 6d; 8 buttons, 7s 6d
Farmer's Albany Calf Gauntlets, 5s 6d
Farmer's Albany Tan Doe Gauntlets, 2s 6d
Farmer's Princess Kid Gauntlets, 7s
Farmer's Hermann, black (stitched backs), 14 buttons, 2s 9d
A large variety of Winter Gloves in the following descriptions:—Fleecy-lined Taffeta, in 2 and 4 buttons, Jersey and spring tops
Cashmere Jersey Gloves, in children's sizes, from 6d per pair
Ladies' sizes, from 1s and 1s 6d
Ladies' and children's Kid, lined, fur tops, &c.

FARMER and COMPANY.

SPRING, 1885.
MANTLE DEPARTMENT.—The reigning fashion for this spring will be garments somewhat small, light in texture, with bead and jet trimmings. Our first consignments will, during this week, be opened out, and a glance at our invoices reveals the fact that in this Department we shall be prepared with an assortment as beautiful as vast. The world of fashion is always more or less moved by the style of garment which takes so prominent a place in a lady's attire as does the mantle, and the leaders and designers of fashion doubtless find their efforts somewhat taxed; but this season's goods go to show that those efforts, so far as the spring of '85 is concerned, have been fruitful to an unprecedented extent.

MANTLES, JACKETS, MANTLETS, MANTILLAS, &c., in the richest materials, becoming to any figure, and at prices simply astonishing.

We shall describe more fully for this room in a few days.

FARMER and COMPANY.

SPRING, 1885.
MILLINERY.—Never in the history of Victoria House have we been so fully prepared for a new season's trade in this department as we are to-day. HAIR-DRESSING has been, and still is, attracting much attention, and, consequently, HEAD-DRESSING has, in its turn, to provide for the partisans of different styles, all alike popular, yet, of course, with divided favour as to adoption. This fact has certainly been borne in mind by our buyer for this season's show, for for variety in style we have never witnessed anything so full of varied novelty. To expatiate at any length is not now our purpose; we prefer our patrons to favour us with a call of inspection. WE HAVE A STOCK OF UNTRIMMED STRAW GOODS fresh from the manufactories, which will certainly command attention, whilst to the connoisseurs of Paris and London novelties we have an exhibition which will safely be regarded as the sunshine of exquisite taste, and be pronounced simply charming. FLOWERS, WREATHS, BOUQUETS, &c., in endless variety.

We shall direct further attention to this particular department in a few days.

FARMER and COMPANY.

SPRING, 1885.
NEW DRESS MATERIALS.—SPECIAL TO LADIES.—The most attractive show of these goods this season in Sydney will undoubtedly be at Victoria House. The position we have, for so many years, had the honour to occupy as Importers, is in itself a guarantee for much that otherwise we might have to say, but for an important consignment such as this now placed before the public, it will suffice to remark that for variety and value it stands unrivalled in Australia.

FARMER'S NEW DRESS CLOTHS.

Satin Soleil Cloth	Romanoff, a novelty
All wool Nun's Cloth	Framboise, a novelty
The Nora Cloth	Wear and Tear Beiges
Indiana Cloth	Nun's Veil Beige
Exhibition Cloth	New Canvas Beige
Estamene Serges	Striped Wool Beige
French Foule Serges	New Vicuna Beige
New Striped Canvas Cloth	New Poplin Brilliante
Velours de Mars	Canvas Grenadines
Voile de Laines	Tennis Dress Stripes.

The above are some of the leading styles for this season, and are now open for inspection.

FARMER and COMPANY.

SPRING, 1885.
WASHING MATERIALS.—The largest and best selection in Sydney. We cannot attempt to describe fairly the immense range of design and colouring imported at the present day in the manufacture of printed goods. It is positively marvellous that Cotton and Linen Textures could be the mediums of so much refined taste as is displayed in so many of the selections before us. We invite earliest inspection of our enormous shipment, feeling sure it is an exhibition in itself. Some thousands of pieces to select from. The names of some lines may indicate somewhat of the extent of our consignment.

FARMER'S UNEQUALLED PRINTS, 4½d Yard
FARMER'S SUPERIOR PRINTS, 6½d Yard.

Galateas	Broche Zephyrs
Sateens	Spot Zephyrs
Oatmeal Cloths	Etruscan Stripes
Percale Prints	Linen Tassores

Fancy Zephyrs	Printed Provencale
Tufted Zephyrs	French Voile
Striped Zephyrs	Cotton Nun's Veiling
Tufted Crepes	Cotton Canvas Cloth
Striped Crepes	Fine Printed Cretonnes.

The foregoing are in plain and fancy textures for combination. Some beautiful goods in White Embroidered Dresses; also charming designs in Toile de Jouy, &c., &c.

SPRING, 1885.
CHILDREN'S COSTUMES.—A volume might be written about these garments alone. Of the many and varied materials, of the still more varied styles, not to mention the numberless modes of trimming, it is impossible to do more than direct attention and solicit a visit. Whatever ladies may find to do, one thing is clear enough, they should not attempt making children's dresses. The cost at which the highest novelties are produced in London is far and away below that which can be arrived at by the purchase of materials and labour here; beyond this, there is always a freshness about the importations from London, which is, generally speaking, unapproached in any home-made garments. This fact is fast gaining credence, the result being that our orders for these costumes is now a very important item in our season's indent, and promises, in a few seasons, to reach its thousands where now we order hundreds. We strongly recommend any and every lady having children to clothe to inspect the unsurpassed assortment we are now showing. Fuller detail we may offer at an early date, but for Children's Dresses of the HIGHEST MERIT and at the LOWEST PRICE, you should unquestionably see our stock.

SPRING, 1885.
LACE AND FANCY DEPARTMENT. Among the novelties for Spring, 1885.—The premier season of the year for novelties in this, as in many other departments, is Spring, and it is quite refreshing to glance through the wonderful variety of goods specially produced for a Spring season at Victoria House. Last year our list was a lengthy one for this counter; this year it is increased, and we are well nigh at a loss to enumerate its belongings.

LACES WILL YET PREDOMINATE as material for fancy articles, and as trimmings for almost every article of attire in the lady's wardrobe. Some splendid specimens of lace are now to hand, promising to meet the tastes of the most fastidious, and at prices, nevertheless, which must meet the approval of the strictest economist.

LACES in WHITE, CREAM, COFFEE, TUSCAN, and other colours, in the following favourite makes:—

Edelweis	Point a L'Aiguille
Bretonne	Dentelle Pointamere
Point D'Alencon	Real Honiton
Dentelle de Caglius	Real Duchesse
Grain d'Avoine	Real Brussels
Point Gaze	Real Valenciennes
Spanish	Real Maltese

Lace Sets and Piece Laces, Figured and Plain Nets in black, white, and colours. Embroideries and Embroidered Goods, Scarfs, Umbrellas, Handkerchiefs, Bags, Dressing Cases, Writing Cases, Fans, Collars, Collarettes, &c., &c.

SUNSHADES.—We have opened a large parcel of these goods in first-class order and value.
Black Satin, gold ribs, 10s 6d, 12s 6d, 13s 6d, 15s 6d, 16s 6d, 18s 6d, 22s 6d
Black Satin, lined black, 10s 6d, 12s 6d, 13s 6d
Black Brocha, gold ribs, 19s 6d, 21s, 22s 6d, 25s, 27s 6d
Fancy Sunshades, in all the newest colours, trimmed lace, &c.

PERFECT SUCCESS / PERFECT SUCCESS / PERFECT SUCCESS of IOLANTHE / IOLANTHE / IOLANTHE
The Libretto by W. S. GILBERT, Esq. The Music composed by Sir ARTHUR SULLIVAN, and interpreted by WILLIAMSON, GARNER, and MUSGROVE'S ROYAL COMIC OPERA COMPANY.
The vast auditorium of the Theatre was again crowded with a REPRESENTATIVE AUDIENCE, who unanimously flatteringly pronounced the production of IOLANTHE to be
A GIGANTIC TRIUMPH
A GIGANTIC TRIUMPH
A GIGANTIC TRIUMPH.
That there is an indescribable charm in the combined work of Messrs. Gilbert and Sullivan, whose artistic efforts to produce a healthy, novel, and highly amusing entertainment have been most ably seconded by the management and all their employees in the scrupulous attention to minute details in this the latest production, was fully attested by the breathless eagerness with which the crowded auditory listened to the charming descriptive music, and the thoroughly original humour of the clever libretto.

SOLICITOR: J. A. Dowling, Esq., 31, Hunter-street.
SECRETARY: Mr. Wm. Woodd, 26, Bridge-street.
CONSULTING ENGINEER: Andrew Innes Liddell, Esq., L.S., C.E.
The TERALBA COAL-MINING CO. is formed for supply of the rapidly increasing coal trade of the world with the port of Newcastle from proved valuable seams, situated on the State line of Railway, and within the minimum haulage limit to the Newcastle Coal Staiths.
The 20,000 shares now offered will provide sufficient capital for the development of and supply of coal from an upper seam within 700 yards of a State line of railway, and the reserved shares will only be sold when developed trade necessitates a larger output than can be effected from one seam alone, thus securing to the Company the increment of value created upon such reserved shares by the increased trade.
The Company has the following advantages:—
1. A State line traverses the property.
2. It is within the minimum haulage limit of Newcastle.
3. It has deep-water frontage to Lake Macquarie, which will ensure opportune relief in the future for direct output by colliers.
4. It has three proved large seams within a depth of 684 feet.
5. The top seam can be worked by adit within a distance of 700 yards of its haulage limit on State line.
6. From upper seam economical output can be secured through the fact that coal will be lowered about 80 feet in 700 yards.
7. Its position and developmental advantages will admit of coal being marketed within six months.
8. The royalty lease includes timber at a fraction of the usual charge to collieries in the district, and secures surface rights of enormous prospective advantages.
For particulars of vicinity, reports, prospectuses, &c., apply to the company's brokers, Messrs. Macdermott, Loughnan, and Scarr, 283, George-street, Sydney.
As the majority of the shares are already applied for, early application for the balance is necessary.

CAPTAIN WALKER'S DISMISSAL.
A statement having been made that Captain WALKER was still in the SERVICE of the A. S. N. Company, the treasurers assure the public that such is NOT the case.

MRS. G. WATKINS, 1, Ragnal-street,—I most humbly beg your PARDON respecting the way in which your character was so injured as for whatever was said by me. I am sure that I had not the slightest idea of injuring your character in the least, which it appears has done, and I am truly sorry for what I have said respecting you in any way whatever.
Yours, &c.,
E. ROBERTS, M'Evoy-street, Woolloomooloo.
August 3rd, 1885.

I WILL NOT be responsible for any Debts contracted by my WIFE after this date, she having left her home without any just cause or provocation.

A WONDERFUL MEDICINE.
BEECHAM'S PILLS
Are admitted by thousands to be worth above a Guinea a Box for Bilious and Nervous Disorders, such as Wind and Pain in the Stomach, Sick Headache, Giddiness, Fulness and Swelling after Meals, Dizziness and Drowsiness, Cold Chills, Flushings of Heat, Loss of Appetite, Shortness of Breath, Costiveness, Scurvy, Blotches on the Skin, Disturbed Sleep, Frightful Dreams, and all Nervous and Trembling Sensations, &c. The first dose will give relief in 20 minutes. This is no fiction, for they have done it in thousands of cases. Every sufferer is earnestly invited to try one box of these pills, and they will be acknowledged to be
WORTH A GUINEA A BOX.
For females of all ages these pills are invaluable, as a few doses of them carry off all humours, and bring about all that is required. No female should be without them. There is no medicine to be found to equal Beecham's Pills for removing any obstruction or irregularity of the system. If taken according to the directions given with each box they will soon restore females of all ages to sound and robust health.
For a weak stomach, impaired digestion, and all disorders of the liver, they act like "magic," and a few doses will be found to work wonders upon the most important organs of the human machine. They strengthen the whole muscular system, restore the long-lost complexion, bring back the keen edge of appetite, and arouse into action, with a Rosebud of Health, the whole physical energy of the human frame. These are "facts" admitted by thousands, embracing all classes of society; and one of the best guarantees to the Nervous and Debilitated is, Beecham's Pills have the largest sale of any patent medicine in the world.
Full directions are given with each box. Sold by all Druggists and Patent Medicine Dealers throughout the colonies.

GREAT BODILY STRENGTH follows the use of PEPPER'S QUININE and IRON TONIC. By enriching the blood and strengthening the muscular system.

GREAT NERVE STRENGTH follows the use of PEPPER'S QUININE and IRON TONIC. It braces up the weakened nervous system. Each bottle contains 32 doses.

GREAT MENTAL STRENGTH follows the use of PEPPER'S QUININE and IRON TONIC. Repairs the ravages caused by overtaxing the brain power.

GREAT DIGESTIVE STRENGTH follows the use of PEPPER'S QUININE and IRON TONIC, as it strengthens the stomach, stopping sinking sensations, removes indigestion, heartburn, palpitation, &c. By its cordial bitter flavour Pepper's Tonic always increases the appetite; and by its use all necessity for beer, wine, or spirit is avoided. Bottles, containing 33 doses, sold by Chemists; but insist on having Pepper's Tonic, made at Bedford Laboratory, London.

PEPPER'S TARAXACUM and PODOPHYLLIN. A fluid combination for derangement of the liver, particularly when arising from slight congestion. By gently stimulating the action of the liver and slightly moving the bowels, the heavy drowsy feeling, headache, pain beneath the shoulders, at the chest after eating, unpleasant taste in the mouth, and manifold other indications of dyspepsia, are removed. Taraxacum and Podophyllin is much safer than calomel or blue pill. Bottles, 2s 9d and 4s 6d each. Sold by all chemists. Insist that Pepper's is supplied. Made only at Bedford Laboratory, London. It is a most valuable medicine for the colonies.

SKIN DISEASES CURED IN A FEW DAYS.—SULPHOLINE LOTION removes Eruptions, Pimples, Redness, Blotches, Scurf in a few days. Is highly successful in Eczema, Psoriasis, Prurigo, Tetter, &c. It totally destroys deep-seated, inveterate skin affections. Sold everywhere.

SULPHOLINE LOTION.—Any one, however deeply and apparently hopelessly afflicted with Skin Disease, should apply Sulpholine as quickly as possible. In two or three days the effect will become evident in a diminished appearance of the malady, a growing tendency to fade away, and complete obliteration of the eruption.

SULPHOLINE LOTION.—As a remedy for Pimples, Blotches, Redness, Rashes, Blemishes, Spots, Roughness, Discolouration, Eczema, Rosea, Pityriasis, Scurf, and General Irritability of the skin, Sulpholine acts like a charm.

SULPHOLINE LOTION.—If desiring to have a clear, spotless skin, take care to try Sulpholine. Its beautiful fragrance and freedom from poisons commend it to all. Bottles 2s 9d. Sold by Chemists. Made by J. Pepper and Co., London.

LOCKYER'S SULPHUR HAIR RESTORER is the safest and best. In a few days it gradually deepens grey or white hair to a perfectly natural shade. Lockyer's surpasses the effect of costly washes. Never disappointing in effect. Guaranteed harmless. Large bottles, 1s 6d. Sold everywhere.

LOCKYER'S SULPHUR HAIR RESTORER produces a perfectly natural colour. The gradual change by scarcely perceptible gradations is certain for removing scurf, beautifying and cleansing the hair, causing it to grow wherever thin and patchy, so ensuring a fine Head of Hair. Lockyer's is unrivalled. Made only in London.

GOUT.—Lithiawater, the comparatively new remedy; highly recommended by medical authorities. Obtainable at Messrs. Dalm and Oertel's mineral water works, 403, Pitt-street, between Liverpool and Goulburn streets.

LAW REPORT.

SUPREME COURT.—Monday, August 3.

(Before their Honors the CHIEF JUSTICE, *Mr. Justice* FAUCETT, *and Mr. Justice* WINDEYER.)

SEWELL V. DAVIS (FYKE CLAIMANT).

Mr. O'Connor, for the claimant, mentioned this matter, which was a motion for a rule *nisi* in the nature of a *mandamus* directing a stipendiary magistrate to adjudicate in an interpleader matter in the Small Debts Court. He asked for a stay of proceedings until Wednesday, to enable him to move.

Application granted.

M'COMBIE V. BENNETT AND ANOTHER.

Mr. Want and Mr. O'Connor, instructed by Messrs. Stephen, Laurence, and Jaques, appeared on behalf of the defendants to move for a rule *nisi* for a new trial. The action, which was tried before Mr. Justice Windeyer and a jury of four, on the 24th and 25th June, was one of alleged libel appearing in the defendants' newspaper with reference to the sanitary condition of plaintiff's licensed premises, the Orient Hotel, George-street North. The jury returned a verdict in favour of the plaintiff, with £200 damages, and a rule *nisi* was now asked for on the following grounds:—(1) That the verdict was against the evidence and the weight of evidence; (2) that his Honor refused to admit other newspapers containing the reports upon which the alleged libel was founded, such reports being expressly mentioned in the said alleged libel as the foundation of the statements therein contained; (3) that his Honor directed the jury that they could not consider, in reduction of damages, the fact that one newspaper admitted in evidence did contain one of the reports upon which the alleged libel purported on the face of it to be founded, as in the said alleged libel mentioned; (4) that his Honor directed the jury that whatever other newspapers chose to publish, it had nothing to do with their verdict whether the articles contained in those newspapers were referred to in the alleged libel or not; (5) that the damages were excessive.

Mr. Want contended that where the authority was mentioned in an alleged libellous article it was a matter for mitigation of damages, and the jury should have been allowed to consider the reports which had appeared in other newspapers on the same subject, and upon which the article complained of was founded. His Honor, however, refused to allow such evidence to be given. There were undoubted authorities to show that such evidence ought to have been before the jury, and if it had been, the verdict would have been only a nominal one. He cited Odgers on the law of libel and slander, page 302; Wyatt v. Gore, 1 Holt's Nisi Prius Cases, page 299; Mullett v. Hulton, 4 Espinasse, page 247; Credie v. Carr, 7, Carrington and Payne; Charlton v. Walton; and Bennett v. Bennett, 6, Carrington, and Payne, and other cases. As to the question of evidence, he submitted that although the article might have been highly coloured, the statements made were substantially borne out by the witnesses called on behalf of the defendants. He also contended that the damages were excessive.

The CHIEF JUSTICE said the defendants were the publishers of a newspaper called the *Evening News*, and in their paper there appeared a letter signed "Sanitas," in which very strong imputations were made upon the plaintiff as to the filthy state in which he allowed his house, the Orient Hotel, to remain, so much so that it was calculated to engender typhoid fever, and did, in point of fact, cause an outbreak of smallpox. These imputations were conveyed in this letter in very strong terms, and complaints were made not only about the filthy state of the premises, but also of the improper food which plaintiff gave to his lodgers. Defendants pleaded a general plea of justification, and in that plea they set out a number of statements which they stated were true, and then, as they were bound to do, set forth reasons why it was for the public benefit that these statements, which they said were true, should be published in their paper. The jury found a verdict for the plaintiff with £200 damages; in other words, they found that the plea of justification was not made out. Of course if they had found that it was made out the verdict would have been the other way. Now the Court was asked among other things to grant a rule *nisi* for a new trial, on the ground that the finding was against the evidence. There was no doubt that there was a strong body of evidence brought forward to show that the plaintiff's premises were in a filthy condition, and that the bathroom, closet, and other portions of the premises were in a most discreditable state. There was very strong evidence to show that that was so. On the other hand there was evidence, which, perhaps, was not so strong, showing that the plaintiff had not kept his premises in the discreditable state in which it was stated in this letter of "Sanitas" that they were kept, and in which some witnesses swore they were kept. But all these matters sworn to on one side and the other went to the jury, and they were the judges as to whether the defendants had made out their plea of justification, the burden of proving that plea being of course upon them. They had to make it out by preponderating evidence, and the jury having the evidence before them, and being the proper tribunal to determine the matter, thought fit to find for the plaintiff. Well, consistently with the rule which guided the Court in matters of this kind, he did not see that the Court could interfere in the way asked. It might be that the defendants were actuated by no motive beyond a desire to benefit the public, not by commenting themselves, but by allowing their paper to be used by another for the purpose of commenting upon what appeared to be a gross piece of misconduct affecting the public; and in the discharge of that duty they might have conceived that they were simply performing a very important service to the public. That was no doubt the way in which his Honor put the matter to the jury; but, notwithstanding that, it must have been obvious that it was of great consequence to the community that there should be power to comment on such a state of affairs as was sworn to; and no one could doubt that a right to comment upon matters of that sort not only existed, but that the exercise of such a right should be encouraged rather than discouraged. Still it was a matter which the jury had to determine, and they found for the plaintiff. He did not think they could disturb the finding, although he might be of opinion that the evidence for the defendants was stronger than it was for the plaintiff. As to the ground that the damages were excessive, the Court had laid down the rule that they ought not to interfere with the verdict of a jury on that ground, unless the excess was very manifest and beyond all question. It was very hard to say in a case of libel whether any amount of damages which a jury might think fit to give were not excessive, and they could not be measured in the same way as the value of articles, the price of which might be deposed to by witnesses. It was a matter of opinion only. The position of the plaintiff, the nature of the imputation made upon him, and the amount of damage which might be done to his business and his reputation in the eyes of the world, must be taken into account by the jury. The jury were the persons who had to determine the matter, and in this case they thought fit to award £200; and he did not think, considering the nature of the libel set forth in the declaration, that the Court were warranted in interfering. Then there were three other grounds, which substantially raised the question whether where an action was brought for the publication of a libel it was open to the defendants to prove that other statements of a similar kind were made previous to the publication complained of, and that the statements complained of were based upon those other publications. They had been referred to a number of cases of *nisi prius* decisions, all loosely reported, and many of which would not hold water at the present day, and some of which had not been approved by other Judges. One had been cited where the Judge thought fit to consult a number of other Judges on the Bench, and after doing so he came into Court and gave his ruling. It was not quite clear that a portion of the subsequent ruling which was relied upon here had the assent of the other Judges, and none of the cases appeared to him to warrant what was asked for on this particular occasion. The second ground in defendants' memorandum was as follows:—"That his Honor refused to admit other newspapers containing the reports upon which the alleged libel was founded, such reports being expressly mentioned in the said alleged libel as the foundation of the statements therein contained." Now, some of these decisions went the length of holding that where a person made a statement, and avowed the statement to be made on the authority of a similar statement previously made, that although the mere copying and reprinting of that would not be a justification, yet it might possibly go to the jury as a mitigation. Well, granting for the sake of argument the authority upon which that seemed to have been held, the facts of this case did not come up to that. What was asked for by the defendants was simply that newspapers that contained statements about this same matter might be given in evidence. It was not asked that reports should be given, because no specific reports were mentioned. There was no statement of any particular person having said anything of that kind, or of any other newspaper having published anything of that kind; but what they were asked to do, and what his Honor was asked to do, was to hold that the defendants could put in evidence in mitigation of damages a number of previous publications of the same kind. Well, the Court were of opinion that the rule might go if the ground was altered so as to be consistent with the facts of the case, and not as drawn up; that was to say, "That his Honor refused to admit other newspapers containing a report on which the alleged libel was founded." That ground as set out in the memorandum involved a statement of fact which was not proved, for there was no proof that these reports were the foundation of the letter complained of, but it raised a broad question, and one of considerable importance, and that being so, he thought the rule ought to go on if the ground was amended so as to read as follows:—"That his Honor refused to admit other newspapers containing statements in substance similar to that contained in the alleged libel." It would be granted simply on that ground, and that would raise the broad question which Mr. Want wished to have argued. He had altered the second ground in the memorandum filed in accordance with that opinion and struck out the others, and then the matter could be authoritatively determined, as far as they were concerned, for the first time.

Mr. Justice FAUCETT entirely concurred with his Honor. As to the ground that the verdict was against evidence, there was no doubt that the evidence for the defendants on that plea was very strong, and quite sufficient if it stood alone to justify a verdict for the defendants; and not only so, but if it stood alone there should have been a verdict for the defendants. But when they heard the evidence read on the other side, although it might not be quite so strong, yet it was sufficiently strong to enable the Court to say that there was evidence on both sides; and in accordance with the general rule upon which the Court acted in cases of this kind, they would not be justified in granting a rule on that ground. As to the other question, he thought it better that it should be discussed broadly and by itself; and as to the question of the damages being excessive, he did not think that could be maintained for a moment. He thought the rule ought to be granted on the ground as stated by the Chief Justice, as it was a matter of great importance, and one which must frequently occur in cases of libel.

Mr. Justice WINDEYER said that he concurred with their Honors in thinking that the rule should be granted, and argued upon the point which was really raised in this case, and that was whether the defendants were entitled to give in evidence in mitigation of damages the fact that other newspapers had previously published articles of a similar character to the one complained of. He of course would not sit on the motion to make the rule absolute, but he must say that when the case was before him he thought the law was clearly settled by the cases which he had before him when the matter was under consideration. His Honor then proceeded to cite from 3 Best and Smith, p. 769, Saunders v. Mills, 6 Bingham, Wyatt and Gore, 1 Holt N.P. c. 297, and Watkin v. Hall 16 L.R. 3 Q.B. It appeared to him that these authorities were clearly in favour of the course he took, and he failed to see why there should be any mitigation of damages, or why a person was entitled to recover less damages because he had been injured not only by the person of whom he complained, but by someone else.

Rule granted on the second ground as amended.

POOLE V. DIXON AND ANOTHER.

Mr. Rogers appeared on behalf of defendants, to move to make absolute the rule *nisi* for a new trial. Mr. Salomons, Q.C., and Mr. G. B. Simpson appeared to show cause. The action, which was tried on the 12th September, 1884, was brought by plaintiff to recover compensation for services rendered as an umpire in an arbitration case. The jury found for the plaintiff, with £84 damages, in addition to £130 12s. pleaded to by the defendants.

The arguments on behalf of defendants were opened, and the Court adjourned.

In Equity.—(Before his Honor the PRIMARY JUDGE.)

ALLAN V. GILROY.

Mr. Owen, Q.C., and Mr. Knox, instructed by Mr. Rawlinson, of Bega, for the plaintiff; Mr. Darley, Q.C., and Mr. Lingen, instructed by Mr. Manby, of Bega, for the defendant.

The arguments in this suit for specific performance of a contract to sell 200 acres of conditionally purchased land, and to transfer 440 acres adjoining, near Bega, if selected, were concluded; and his Honor intimated that, as the decision would be one of considerable public importance, he would reserve it, and prepare a written judgment.

READFORD AND ANOTHER V. CALLAGHAN AND ANOTHER.

Mr. Gordon, Q.C., and Mr. Lingen, instructed by Mr. Dunn, for the plaintiffs; Mr. Owen, Q.C., and Mr. A. H. Simpson, instructed by Messrs. Holdsworth and Evans, for the representatives of John Caldwell, deceased; Mr. W. G. Walker and Dr. Sly, instructed by Messrs. Allen and Allen, for the representatives of Samuel Callaghan, deceased.

This was a suit brought by James Readford and his wife to have an account taken in the estate of the late William Turley, contractor of King-street, who died in 1852. The defendants are the representatives of John Caldwell and Samuel Callaghan, now deceased, who were the trustees of the testator. In February, 1882, a similar suit in which William Turley was plaintiff was tried by his Honor Mr. Justice Faucett and dismissed, principally on the ground of *laches*, as it appeared that Turley had seen the trustees' accounts just before they were filed in 1864. On that occasion Mr. Caldwell was examined, but his fellow trustee was too ill to be present. The plaintiff now read the Judge's notes of Mr. Caldwell's evidence. The plaintiff, James Readford, was examined, and as he admitted that he had found three-fourths of the money with which William Turley had brought his suit, Mr. Owen took the point that the suits were in all respects the same, and that before the Court should be dismissed. Counsel having argued the point, his Honor dismissed the suit with costs between attorney and client. He remarked that it would be an abuse of the authority of the Court to allow this second suit to go on, especially as the plaintiff admitted that, although he had found three-fourths of the costs for the plaintiff in the other suit, the costs awarded the defendants on that occasion had not been paid.

INSOLVENCY COURT.—Monday.

METROPOLITAN DISTRICT COURT.

MONDAY.

(Before Mr. District Court Judge DOWLING.)

His Honor commenced hearing the undefended cases at 10 a.m., and afterwards disposed of a number of causes in which sums amounting to under £10 were claimed. A large amount of business was dealt with, but the proceedings were devoid of public interest.

METROPOLITAN QUARTER SESSIONS.

MONDAY, AUGUST 3.

(Before his Honor Judge WILKINSON.)

The Metropolitan Court of Quarter Sessions was opened at Darlinghurst Courthouse this morning, his Honor Judge Wilkinson presiding. Mr. F. J. Healy appeared as prosecutor for the Crown. The following jurors were fined 40s. each for non-attendance, viz.: William Henry Howes, artist; John Little, auctioneer; and Sylvester Stanley, grocer. There are 116 cases on the list altogether. The prisoners were duly arraigned, and the following pleaded guilty, namely: — *Luke Murphy*, larceny, two charges; *Mary Ann Neary*, stealing in a dwelling; *Kate Carroll*, stealing; *Edward James Ladd*, false pretences, two charges; *Joseph Norton*, larceny, two charges; *Thos. Hanson*, attempt to commit suicide; *Ernest Douglas*, stealing in a dwelling; *Morris Flynn*, larceny; *Thos. Soli*, burglary; *Walter Stanley*, forgery, six charges; *Thos. Wetherell*, stealing in a dwelling; *George McLeod*, forgery, four charges; *Jno. Green*, wounding; *Jno. Cunningham*, forgery, four charges.

James Fletcher was charged with having, on 13th of May, at Ashfield, forged a certain warrant-order for the payment of £1 14s. 9d. The facts were briefly these: The accused went to a grocer's shop kept by E. S. Wilkinson and purchased certain articles, in payment for which he tendered a cheque purporting to be signed by Andrew Torning, stating that the cheque had been given him in payment of wages. Mr. Torning was called, and proved that the cheque did not bear his signature, and that it had not been given by him to accused. Prisoner cross-examined the witnesses at some length, and made a long and rambling statement to the jury, the effect of which was that he was in work at the time he was alleged to have committed the forgery, and had no need, therefore, of laying himself open to such a charge; that he had obtained the order from a fellow-workmen, that he would repay Mr. Wilkinson the value of the cheque, and, last but not least, he had a wife and family, who, according to his own statement, were, if possible, even more innocent than himself. Some lengthy testimonials were put in by the accused, in which his previous character was stated to have been good; after which the Judge addressed the jury. After a retirement of two hours the latter found the prisoner guilty, and he was accordingly remanded for sentence.

A lad named *Herbert Turnham*, aged 14, was charged with breaking into and entering the shop of Emanuel Behn, Hunter-street, Sydney, and stealing therefrom five yards of cloth, four coats, six vests, and eight pairs of trousers, the property of Emanuel Behn. Evidence was given bringing home the charge, and the jury, after retiring, found the prisoner guilty of stealing. His Honor declined to receive the verdict, pointing out that although a perfectly admissible one if there were no evidence to prove that the prisoner had also broken and entered premises from whence he had stolen the goods, yet that in the present case the evidence clearly showed that the premises had been entered and the goods stolen by the same person. The jury again retired, and ultimately brought in a verdict of guilty, without any reservation. Prisoner was remanded for sentence.

A young man named *William Hargraves* was charged with disturbing a Salvation Army service at Pyrmont. It appeared that prisoner and a companion attended a service and commenced singing in a boisterous manner while a discourse was being given. The "lieutenant" remonstrated with him, but prisoner took but little notice, whereupon the "lieutenant" threatened to call the police. The accused then "waltzed" out of the building with his companion, and was subsequently arrested. A very well-written address to the jury was read by his Honor on behalf of the prisoner, and, judging from his Honor's remark of surprise, the handwriting was as good as the composition, but it did not have the desired effect on the jury, who found the prisoner guilty. As the accused had already been two months in gaol, he was let off with a month's imprisonment.

Subjoined is the list of cases for trial to-day:—John Waters and another, larceny; Michael Malone, larceny; Marian Lester, larceny; Edgar Earnscliff, larceny; James Guy, embezzlement; Nicholas Paulsich, breaking and entering a dwelling and stealing therein; Albert Beltof, breaking and entering a dwelling and stealing therein; and Charles Brown, keeping a house of ill-fame.

POLICE.

Mr. Buchanan, S.M., dealt with the charge cases at the CENTRAL POLICE COURT yesterday. About 25 drunkards and roysterers were disposed of. *George F. Arthur*, for indecency in George-street, was fined 10s., or two days; and *Robert Young*, labourer, for obscenity in the same place, was fined £3, with the option of two months. *Thomas Jones* and *Arthur Jones*, two young labourers; *Joseph Riordan*, soldier; and *George Rowley*, tobacco-twister, were each similarly dealt with for a like offence. *William Gray* and *James Dunne*, labourers, on remand, were sentenced to six months' hard labour for having attempted to steal 25s. from the till of Cochrane's Family Hotel. They had been caught red-handed, and the police records showed that both had been previously convicted of larceny. *James Rose*, 29, and *William Green*, 25, railway guards, were remanded on charges of having stolen a family Bible, value £5 5s., from the residence of James Kirby, No. 9, Gould-street; also with having stolen four bottles of brandy and two pairs of boots, value £2, the property of the Commissioner for Railways; and, further, with having been found by night on the premises of James Cleary, 13, Foveaux-street, with intent to commit a felony therein. *Charles Shepherd*, labourer, received a sentence of three months' hard labour for having stolen a seaman's bag containing a coat, &c., value £5, the property of John Horn. *Thomas Joseph Byrnes*, 8, charged with having no lawful means of support, was discharged, and a recommendation made for his admission to the Benevolent Asylum. It was shown that his physique and tender age rendered his transmission to the training-ship Vernon undesirable. Mr. Abbott, S.M., disposed of a number of small debts cases on the Summons side.

Mr. G. W. F. Addison, S.M., dealt with the business in the Charge division of the WATER POLICE COURT yesterday. A number of persons were fined for drunkenness. *Cavendish Hargreaves* was sentenced to seven days' gaol for having two overcoats in his possession, which were reasonably suspected to have been stolen. *James M'Gowan*, 26, jockey, received a month's imprisonment for having two Muscovy ducks in his possession, which were reasonably suspected to be stolen. *Frederick B. Renwick*, 24, clerk, was fined 20s., or seven days to gaol, for behaving in a riotous manner in the Domain. *Henry Bain*, 45, described on the charge-sheet as having no occupation, was sent to gaol for a month for having insufficient lawful means of support. A jockey named *John Regan*, 18 years of age, was ordered to pay a fine of 40s., or go to prison for seven days, for being drunk and disorderly in Cleveland-street. For a like offence in the same thoroughfare, a labourer named *Joseph Clayton* was fined 40s., or seven days' gaol. *Annie Reynolds*, 40, no occupation, for drunkenness and disorderly conduct in Crown-street, was mulcted in a penalty of 40s., in default seven days. *John M'Pherson*, 54, fireman, for being drunk and disorderly in Oxford-street, Paddington, was ordered to pay the sum of 40s., or go to prison for a term of seven days. For a like offence in George-street, *John Mahony*, 27, labourer, was fined 40s., in default of payment seven days to gaol. A Swede, named *Charles Johnson*, was fined 40s., or a month's imprisonment, for using indecent language in Bettington-street. A fine of 40s., or seven days' gaol, was imposed upon *Jane Hall*, 42, for being drunk and disorderly in Argyle-street. *William George*, 71, no occupation, was sentenced to two months' imprisonment for having insufficient lawful means of support. *James M'Carthy*, 26, labourer, was fined 20s., or four days' gaol, for drunkenness; and for making use of indecent expressions in Oxford-street, he was further fined 40s., or a month's incarceration. For behaving in a riotous manner in Collins-street *Henry Turner* was fined 20s., or seven days' gaol. *Julia Adrian*, 29, a native of France, for riotous behaviour in William-street, was fined 40s., or one month to gaol. *Kate O'Brien*, 25, no occupation, was fined 20s., or four days' gaol, for drunkenness and disorderly behaviour in Bourke-street. For a similar offence in Phillip-street, *Mary Bury*, 48, was fined 40s., or seven days. *John Ryan*, 39, labourer, was sentenced to three months' imprisonment for having no visible lawful means of support. *John Brennan* and *Edward Archer*, seamen belonging to S.S. Potosi, were each sentenced to two weeks' gaol for deserting from that vessel. Mr. Leopold Yates, D.S.M., disposed of the business in the Summons division. Inspector E. Oram prosecuted a number of persons for breaches of the Metropolitan Transit Commissioners' bylaws.

At the PARRAMATTA POLICE COURT, yesterday, before Messrs. C. J. Byrnes, F. S. Ryan, and F. C. Cox, J.P.'s, *William Turner* was charged with stealing a gold albert chain from the shop of Mr. G. E. Richardson, jeweller, Mercury-buildings, on Saturday evening last. The evidence showed that shortly before 8 o'clock the prisoner entered the shop and asked to be shown some gold alberts which were hanging in the window. A bar on which were hanging 11 chains, valued at £50, was laid in front of him on the counter, and he immediately snatched it up and ran away. In his hurry he dropped nearly the whole of the chains at the shop door, and 10 of them were eventually recovered, the last being found on the prisoner when arrested. Although pursuit was immediately made the prisoner for a time made good his escape, but was captured about an hour after the robbery took place. Prisoner reserved his defence, and was committed for trial at the ensuing Parramatta Quarter Sessions.

CAST-IRON PIPES.

TO THE EDITOR OF THE HERALD.

Sir,—I do not desire to enter into the discussion on the above subject which has been carried on in your columns for some time past; but I would simply like to ask Mr. R. C. Luscombe if he can assign any reason why a colonial firm can hardly be expected to compete with a foreign firm for castings. As he will no doubt be somewhat at a loss for a definite answer, I will supply him with one. A colonial foundry-master must buy his iron to make his castings from those who bring it into the country, because no iron is made here. Thus he has to pay from 50 to 75 per cent. more than the English price of iron to start with; then he has to pay a higher rate of wages than an English firm, and thus he is doubly handicapped. Would it not be infinitely more practical and useful to endeavour to make iron in the colony for our manufacturers' uses than to indulge in idle vituperation of those who undertake to supply us with that with which (under present circumstances) we cannot supply ourselves? I have read many absurdities as regards iron in the press above Mr. Luscombe's signature which I have refrained from pointing out, because I respect the sincerity of that gentleman's motives, but really the time seems to have arrived when as a practical man I ought to speak.

I am, &c.,
W. M. BOOTE.

LAWYER HOUGHTON'S CASE.—I wish to inform you, and through you all who are interested to know the fact, that a most disagreeable and obstinate case of salt rheum or eczema, which has been under my personal observation from its first appearance to the present time—about ten (10) years—covering the greater portion of the patient's body and limbs with its peculiar irritating and itching scab, and to which all the known methods of treating such diseases had been applied without benefit, has completely disappeared, leaving a clean and healthy skin under a profuse application of the Cuticura Remedies. I can and do heartily advise all similarly afflicted to try the remedy which has been so effectual in this case.—Chas. Houghton, Law Office, 28, State-street, Boston.—[ADVT.]

WATER CONSERVATION COMMISSION.

[BY TELEGRAPH.]

(FROM OUR OWN REPORTER.)

HAY, MONDAY.

Messrs. Lyne and Gipps, members of the Water Conservation Commission, left Hay shortly before 3 on Friday afternoon, accompanied by Mr. James Tyson, jun., and, after a drive across the plains about due west, reached Tyson's Corrong station, where they were hospitably entertained that night. The station is on the Lachlan River, and the homestead is surrounded by a beautiful garden and orchard. Many of the fruit trees are of great growth, as also the ornamental trees and shrubs, including large specimens of the pepper tree, and a number of healthy, well-grown vines, one of which yielded last season considerably over a ton of grapes. A noteworthy feature of the whole thing is that all is due to irrigation, water being raised from the river by means of a whim, and distributed over the ground through pipes. Without this irrigation none of these things would grow, and outside the garden the place looks desolate. The party left Corrong at 9 o'clock on Saturday morning to inspect an extensive cutting being made by Mr. Tyson from the Lachlan River across a portion of Corrong station, through Tupra station, to divert its waters into a large natural basin, known as Duck Shot Lake, on Tupra run. The lake is about 60 chains in diameter, almost circular, and when full of water is about 30 feet or more in depth. The length of the channel is 26 miles, of which 10 miles consist of a new cutting, and for the remainder of the distance the natural creek beds or water channels are utilised. The work is extensive, of a permanent character, and of almost national importance, more particularly because by the operation of the new Land Act it may become available to numerous settlers for diverting the water into any number of tanks or dams. The question is whether the line of the channel ought not to be reserved in the interests of the public or such portion of the work as may be deemed necessary carried out at Booligal Lake, where a flood in the early part of the year broke through the newly-formed bank, allowing the water to escape over Lignum Lake or flat, about one mile in extent and several feet deep.

The Commission took the evidence of J. L. Gawyder, who stated that he had been in the district about 16 years, and on Corrong station as manager about two years. Twelve months ago, before the flooding of the present cuttings, two paddocks, five by six miles and six by eight miles respectively, used to carry 4000 sheep, and the sheep came off in bad condition, with a break in the wool. After the cuttings were made the waters were turned on to the country, when it carried 12,000 sheep, which came off in very good condition. The sheep were fit to travel to any place, and the wool was sound. The land had had two floodings—the first shortly after the cuttings were made, and another in January or February this year, flooding one paddock three by five miles, and another about two by six miles. The year before the irrigation he lost 1500 or 2000 sheep out of 4000; but after irrigation the land carried 12,000 sheep, and there was a profit on the increase in the number of sheep carried—that is, for 8000 it would be 3s. per head. The total profit between the two years was about £1800, leaving out of calculation the difference in the wool between the two years, the depreciation being at the rate of about 1s. per sheep. Besides this, the land fed 120 cattle, and carried over 200 horses. The total cost of the work for irrigation of these two paddocks was £1200. The cuttings were from the Lachlan. The depth of water which flooded the paddocks was from 2 feet to 3 feet 6 inches. The first flooding lasted about six weeks, and the second about 10 weeks, and where the land got a good soaking there was good feed at the present time.

The Commission reached Tupra station, where the party remained the guests of Mr. James Tyson, jun., and of Mrs. Tyson, who were most hospitable. The homestead is situated on the banks of the Lachlan River, which is about 20 yards wide, and of good depth. The house is unpretentious in appearance, but very comfortable internally, and the generous welcome made the stay most pleasant. Attached to the house is a small garden and orchard on the river bank, irrigated from the river by means of a windmill and Californian pump. By these means water is lifted from the river and conveyed by means of pipes to tanks in various parts of the gardens. These are connected underground by box drains, made of rough timber nailed together, and the edges of the timber being uneven there is necessarily great leakage from these drains, which are about four feet underground. This leakage is drawn upwards, and renders the soil till quite close to the surface very moist, thus affording abundant liquid nourishment to the plants. The effect is seen in the wonderful growth and productiveness of the vegetables, fruit trees, grape vines, and flowers, and were it not for this irrigation attempts at cultivation would be futile in a climate where there is so little rainfall. The Commission took the evidence of G. E. Ashcroft, of Boyong, a place about 10 miles beyond Tupra station. Mr. Ashcroft stated that he was a selector of 4000 acres, and had been living on it about seven years. He had been living in Riverina 28 years. When the water broke out from the Lachlan he checked it with dams or led it by cuttings as necessary in diverting the water over the land, but there was only sufficient water to flood the land once a year. The depth in some places was only four inches, while in creeks or depressions it was two or three feet. He had his land divided into paddocks. The country required an extraordinary quantity of rain to fertilise it. His land would carry four times as many stock with flooding as it would without. Last year was a bad season, and where the land was not irrigated it would not carry anything. He irrigated about 2500 acres, and had really good feed all over that area. He ran his own stock, and took in the stock of other people for grazing. He ran 1000 sheep and 140 cattle of his own, and grazed 240 cattle and 450 horses for other people. From October till about the middle of April there was nothing on the other 1500 acres of his selection. He made 5s. per head on his sheep, £2 10s. per head on 160 cattle sold, and 12s. 6d. per head on grazing cattle. The horses averaged about 25s. each. His clear profit was £1322 10s. for the year. In addition he fed a quantity of stock gratis for small selectors, and about 100 head of stock in addition to his own. During flooding, the water remained on the land from early in September till about the latter end of December.

P. B. Moore, of Moorelands, a selector of 640 acres, stated he had been on his selection over two years, and in the neighbourhood for the last 20 years. In addition to his own holding he rented 1280 acres from selectors. The country was of reed-bed, or gum-timbered country. The first year he was here he had water over nearly the whole of the land, and since then, during last winter, he had water over less than one-third of the whole area and not 40 acres of his own. The first year he made over £1000 for grazing, and last year he did not take £500. He only grazed stock, as he could not cultivate the land. If he could afford to dam back the water and cultivate, he believed he would be able to grow crops. When his land was flooded there was an average depth over it of about 18 inches of water. The first year the water remained on the land a good four months. His land was nearly at the end of the reed-bed. After the water ceased running in the river it went away in soakage. He could get water by sinking in reed-bed to depths of 15 feet, where the water was in thick, gluey sand, and the water rose and fell in the well with the flood, but never sank lower than 15 feet. He used a windmill, 10 feet in diameter, with 1½-inch pump, which answered his purpose. All the pumping he did did not seem to affect the well. During the summer he got wind sufficient to turn his mill about three days a week, but at the present season not more than one day per week.

James Tyson, jun., residing at Tupra station, said he had resided on this and the adjoining station 37 years, and he had known all the floods during the last 29 years, the heaviest having occurred in 1852 and 1870. The flood of 1864 was not so heavy here as those of 1852 or 1870; they sometimes had floods three or four years in succession. The longest period without a flood was three years. At the present time all the creeks and depressions were filled in. The floods which occurred in the interval between 1852 and 1870 did not fill the depressions. The first cutting to lead the water into the back country was made in 1861, from Lignum to Bucharhon Lake, a distance of 4½ miles. Lignum Lake is filled by natural creek beds from reed-beds of the Lachlan. This lake had still about 6 feet of water. In 1884 he cleared out the cutting, so that a fresh every third year would fill the lake, or give sufficient water. The cost of that work was £640 per mile. The previous proprietor had made a cutting into the Bunamberk Lake. Witness increased the size of the cutting at the latter end of 1883, and was confident the lake would never be dry again. The third cutting was made in 1864, and thence the water flowed 5½ miles into Box Creek, the water running into it about a year after the cutting was made, and the lake had never been thoroughly dry since. Witness heard that the cost of the 5½ miles of cutting was £14,000. The depth of the cutting was 9 feet in places, the width at the bottom 12 or 14 feet, with a slope of 3 to 1, the fall being about 1 foot per mile. In every cutting made they allowed about a foot per mile. The next work was a cutting about 10 miles west of Bunamberk Lake, on Juanbong Station, from Box Swamp into a lake alongside of Mount Emu. That cutting was about three quarters of a mile long, about three feet deep, and 14 feet wide, and was made in the year 1870. The water down this cutting did not go further than the lake, which is only a natural basin or depression, holding about 10 or 11 feet of water. That cutting was also made in 1870; but previous to that a cutting was made from Duckshot Lake into Lignum Swamp west of the lake, and the water was taken from the swamp to Duckshot, a distance of two and a-half or three miles, through a cutting 14 feet wide by two or three feet deep. The cutting was made in 1869, and in the high flood of 1870 within two months the lake was filled. The lake was about three miles in diameter and ... feet deep in the centre, with gradual slopes to the banks. The next permanent work was a dam of about two and a-half miles from the Murrumbidgee to Cockatoo Plains, the object being to force the water north and west, but no benefit has yet been received from the work. From that about six miles below the junction of the Lachlan and Murrumbidgee the water course had a succession of dams, shutting up the channels to and preventing the water returning by those ... The work cost about £1300, and the effect would be to cause an ordinary flood or fresh to irrigate fully 50,000 acres of land, in addition to forcing the water to the level, enabling him to fill Mount Emu Lake. In 1884 he made a cutting from Ryan's Lake by Bullaga Lake, thence to Duckshot Lake, thus making channel for water to flow 26 miles from the Lachlan River. There were gashes made in the Lachlan bank to lead the water into this cutting, and there is a dam in the Lachlan below the gashes, which raises the water whenever a fresh comes down, so that it will flow out through these gashes; and if sufficient water be brought down by that means, the water can be turned into Box Creek, which enters the Murray somewhere near Euston. The effect of this work is by a complete channel system to get a direct course for the water right through to Duckshot Lake, and to prevent the water from going back into the river or going back to the low lignum flats, which absorb immense quantities of water to no purpose. By this cutting they would be able to fill the Duckshot Lake in any ordinary fresh. Previously there was no certainty once in 10 years, but now there will be a certainty of water in Duckshot Lake once in three years, and a certainty every year of 30 acres of land being flooded. The distance of the water channel is 26 miles, but in some places the natural creeks have been utilised, so that the whole length actually cut has been about 10 miles, and the cost about £5000. The size of the cutting is 18 feet wide and from one and a half to five feet four inches deep. In one part the fall in a distance of five miles is seven feet; and in another place there is a fall of five feet in one mile. He was quite sure that it was possible to dam the river. There were several dams in the Lachlan, some of which were built as far back as 1860. There are plenty of bars in the river. The dams were built of mud, and were so situated that the natural depressions on either bank served as bywashes. He estimated that the works up to the present have caused an increase of three to one in the carrying capacity of the stations, and when the whole of the present works come into operation the carrying capacity will show an increase of five to one. There are 10 mud dams across the river from Hillston downward. There are plenty of natural courses by which the water leaves the Lachlan River, both up and down the river. Comachong Lake, near Oxley, is filled by a cutting three-quarters of a mile in length, from Buconia Creek, and is of average depth of 10 feet. The lake was last filled about two years ago, and at present it has about 6 feet of water. It waters 20,000 sheep every year.

Yesterday the commission were driven over the country to inspect these various works, and they inspected 45 miles of the Lachlan frontages, commencing a little above Corrong station to the junction of the Lachlan with the Murrumbidgee. They rode through the reed beds in which the Lachlan appears to lose itself as a river. At the junction with the Murrumbidgee the Lachlan is a mere dribble. These reed beds are valuable for grazing purposes, and part of them within the selections of Messrs. Ashcroft and Moore, both of whom gave evidence before the commission. So luxuriant is the growth of the reeds that the cattle almost disappear among them, but the beasts become rolling fat. There are about 40 selections in Mr. Ashcroft's neighbourhood. Mr. Ashcroft made hay of a quantity of these reeds, and last year he fed the stallion Sir Hercules upon this reed-hay mixed in equal proportions with ordinary hay, and this horse took first prize at the last Hay show. The stock are exceedingly fond of and do well on these reeds, whether green or as hay. The party proceeded to Juanbong station, where they had dinner. The homestead, which is prettily situated on the bank of a pretty lake, is an elegant brick house, but it is only occupied by the manager. Leaving Juanbong, which is distant from Hay 72 miles, the party returned to Tupra station homestead for the night, having travelled 60 miles by buggy and on horseback. This morning they left Tupra, 35 miles from Hay, staying for lunch at Corrong station, and reaching Hay at 6 o'clock. Mr. Gipps leaves here for Sydney to-morrow, and Mr. Lyne goes to attend the Corowa show.

YOUNG MEN'S CHRISTIAN ASSOCIATION'S NEW BUILDING.

It may be remembered that during October, 1883, the foundation-stone of a new building for the Young Men's Christian Association, at the intersection of Pitt and Bathurst streets, was laid by Mrs. Margaret Hampson, the well-known lady evangelist. At the time we described somewhat fully the character of the proposed structure, which is now almost completed. The land cost the committee no less than £13,000, and the contract for the building was £20,000 additional; against which amounts a trifle over £11,330 was at the time in hand. Mr. Thomas Rowe (of the firm of Rowe and Green) is the architect. Mr. R. Sime has contracted for the masons' work; while Mr. W. Coleman has had in hand the carpenters', joiners', and finishing trades contracts; Mr. Rowe acting as clerk of works. The structure is rapidly becoming ready to be handed over, and within a week or two is to be formally opened. Externally and internally it is a credit to those concerned. The basement area includes 60 feet frontage to Pitt-street and 14 to Bathurst-street. The ground floor of the new building is to be devoted to thoroughly fire-proof shops, eight in number—two in Pitt-street and six in Bathurst-street. The first floor is approached by a spacious entrance, with stairs leading to the landing, off which is entered the lecture hall (66.6 x 40.6 x 29 high) and reading-room (39 x 24.6 x 16 high); also the refreshment-room, secretary's office, and parlours. At the end of the large reading-room is the honorary secretary's room and library. At the western end of the lecture hall is a choir gallery and platform, and at the eastern end a gallery. The lecture hall is lofty, thoroughly ventilated, with acoustic properties well studied. The interior of this has been effectively treated, with coved and panelled ceilings broken into bays. From the principal landing, by a bold flight of stairs, will be reached the second floor, upon which are the class-rooms, three in number; also the dining-rooms, with patent lift from a kitchen from above. By a passage from the same landing the gallery of the lecture hall is entered. The lecture hall, with gallery, will accommodate between eight and ten hundred adults: and the third floor above is approached in similar manner. Upon this floor is one of the largest gymnasia in Australasia, so constructed as to prove no annoyance to the rooms below. Upon this floor, at the eastern end, is the large lofty amusement room, also bedrooms and lavatories; and from the landing is entered the custodian's room and living-room and bathrooms. In the north-west corner the kitchen is situated, with provision for lift, &c. From the western end of the building, in Bathurst-street, there is a fine entrance to platform and other parts of the building. The exterior has received careful study, so as to produce one of the noblest features of architecture in the city; and bearing this out, the style adopted has been a free treatment of Gothic. The fronts to Pitt and Bathurst streets will be built of brick with stone, and the principal entrance will be from Pitt-street, marked by a bold, imposing doorway, with Gothic arch, supported or embellished with angle columns, with moulded base and enriched carved caps. The arch of the door is marked and made very effective by bold label and enriched spandrils. On each side of the door are massive piers, with angle columns, with foliated caps and moulded bases. The centre of each pier is marked by double band mould, with centre part filled in with quatrefoil. On each side of grand entrance is a shop with massive plate-glass front, with upper portion of sash filled in with ornamental glass in lead quarries. The Bathurst-street shops are similar in treatment. The Pitt-street corners or boundaries are treated in the same bold manner, with massive and well-designed piers, forming bays, and producing an attractive central feature, and the shops in both streets are crowned with a bold and well-designed dentalled entablature. The entrance from Bathurst-street has been treated with the same effect as the front entrance. The first floor of each frontage has been beautifully treated, breaking up the front into bays; and over each shop in Pitt-street, and the return end in Bathurst-street, are triplet windows, treated with mullions and columns, with rich foliated caps; moulded bases, with central bands to shafts of columns, supporting the Gothic-headed windows, crowned with neatly designed labels with foliated bosses, resting on an abacus band, with necking under the same, continuing along the front and side in Bathurst-street. The bays in Bathurst-street front over each shop are couplet windows, treated in the same effective manner as those in Pitt-street. The piers are less massive, but possessing the same architectural and pleasing effect as the larger ones, with shaftlets on the angles, with small caps and bases, and terminating with Gothic gablets, with carved finial. The second floor is similarly treated, the floor being marked by a bold and effectively designed string, with ball flowers inserted in the cavetto portion of mould. The whole of the floors, in both streets, are surmounted or crowned with a well-designed entablature, supported by rich foliated blockings, the space between each block relieved by a richly-designed patera. Above the entablature, the parapet continues, with small mould crowning it, both being broken by the massive piers of Pitt-street being carried above, and also in Bathurst-street with small piers. These are formed into Gothic gablets, and moulded with angle columns and crocketted pinnacles, the apex being finished with richly foliated finials. The fronts of gablet portion of large piers are filled in with Gothic panels, with cusped arch. The central feature of front entrance is well marked by a pediment with flowing band, with name of society inserted on same. The side entrance is also well and effectively treated, this being crowned by a very imposing Gothic diapered gable, with finial. Both fronts are broken by the piers, producing an agreeable play of light and shade. The Pitt-street front being the principal, the roof on each side of entrance is carried up, forming steep mansard roof, breaking the sky line, and producing a grand appearance for the main front; the roofs being enriched with cresting of ornamental iron. From the top of the flats a magnificent view of the city and its surroundings obtained. The side roof in Bathurst-street is a low mansard, broken up by effectively treated dormers and storm lights. A rather noticeable feature in the building is a patent system of ceiling, by Messrs. Braby Brothers, of London and Sydney. This consists of an adaptation of ceiling formation whereby the possibilities of a fall of plaster or other material are reduced to a minimum, if not altogether put out of the question. It is intended to formally celebrate the opening by a conversazione upon a large scale, preparations for which are already in hand.

THE LAND AND INDUSTRIAL ALLIANCE CONFERENCE.

The conference held under the auspices of the Land and Industrial Alliance and similar organisations was continued at the Temperance Hall, Pitt-street, yesterday. At the earlier portion of the sitting there was an attendance of about 20 delegates, and the chair was occupied by Mr. Argyle M'Callum, of Yass. Mr. L. F. Heydon, M.L.A., arrived at about half-past 11 o'clock, and the chair was at once yielded to him. He explained that his absence had been due to his waiting upon the Minister for Lands, who had arranged to receive a deputation from the conference at half-past 2 o'clock on Tuesday afternoon. He stated, moreover, that he called at the Government Printing Office, and had there learnt that what had been stated at that conference with regard to the stoppage of the sale of the land regulations was only too true—that departmental instructions were issued last week for the office to cease issuing the regulations. It was stated that new regulations were to be issued, and, although the land office day was fixed for the 6th, they were not yet obtainable. At a later stage of the proceedings the chair was temporarily occupied by Mr. John Gale.

AMENDMENT OF THE MINING LAWS.

Mr. W. H. L. BAILEY moved,—"That, as the mining laws of New South Wales are imperfect, and are worked in a lax and unsatisfactory manner, it is imperative to provide for such amendments as will prevent the defrauding of the public by bogus companies, the locking up of mineral lands, the evasion of labour covenants, and the loss of life by bad ventilation, defective machinery, and other causes." In the course of some remarks in support of the motion, he complained of the large number of mineral conditional purchases which were simply used to block settlement. The only good feature he could see in the new Act was the repeal of those mineral conditional purchases. He thought if we had better laws Silverton would be occupied by thousands of persons. (Hear, hear.) He complained of the tardiness with which the Mines Department issued leases. He thought that there should be an amendment of the mining laws, and that facilities should be given for genuine miners to take up land for the bona-fide development of the minerals contained in it.

Mr. W. T. CRICK seconded the resolution. He considered that the mining laws were a real Sphynx's puzzle. The chief abuse was the acquiring by a small number of people of large tracts of country. Mineral conditional purchases had been used to lock up large blocks of land. He thought if there were one industry more than another which should receive consideration it was the mining industry which had attracted large numbers of people to these shores. (Hear, hear.) When Silverton was about to be developed they saw members of Parliament trotting off, assisted by their free railway passes, to take up mining leases and mineral licenses. He thought that subject should be brought under the notice of the electors at the next general election. (Hear, hear.)

Mr. W. D. WRIGHT, of Narrabri, in supporting the resolution, admitted that he knew very little about the mining law. He knew, however, with respect to Narrabri, that no mineral had ever been found there, and yet mineral leases had been used by squatters to block selectors. Those lands were held, not for the good of the country, but to enable the squatters to reap the benefit. So far as the question of ventilation was concerned, he thought there ought to be better ventilation in many mines.

Mr. J. FLANAGAN, of Gunbar, said that, like the last speaker, he could not speak from experience upon the question of the mining law. He knew enough, however, to be able to say that the laws were being greatly abused.

Mr. M. TULLY, of Grabbengullen, said he worked in a mine about 30 years ago, and, although he was not so well acquainted with the present laws, that which was then in existence he knew was very defective.

Mr. JOHN GALE of Queanbeyan, said he had a considerable local knowledge of the defects of the mining law. There was an important mining field between Queanbeyan and Braidwood, and known as Captain's Flat. There was a place called the "Coffee Plain" in particular, to which he would like to refer, and which had been subjected to the action of fire. The coffee-like deposit had been found to abound in silver. If they had a mining law which would give fair play to all with respect to that coffee plain, there would be no complaint. As a matter of fact a strong syndicate had jumped that field. He had great pleasure in supporting the resolution.

Mr. W. S. TARGETT, M.L.A., expressed his regret that he had been prevented by important duties in connection with the Commission on Water Conservation, which required his presence at Hay, from attending the conference earlier. He believed that the burning question of protection would become before very long the question of the day. (Hear, hear.) Now, he was quite in accord with the resolution. He considered that the mining laws of New South Wales were very primitive, and not at all suitable to the requirements of the day. It struck him as being marvellous that the previous Government did not make an effort to grasp the requirements of the colony in that respect, and deal with them. Of course the present Parliament had had its work fully cut out for it, and its time had been so fully taken up by very important questions that it had had no opportunity of dealing with mining matters. He did say this, that the mining laws of New South Wales were wholly inadequate to the necessities of the time, and it was high time some alteration were made. (Cheers.) One speaker had referred to the enormous areas of land held by mere speculators. It was well known that large tracts of land in Lake Macquarie, Bateman's Bay, and Shoalhaven districts were held by mere speculators, who held those lands without ever having contributed a farthing towards the revenue of the colony, and held them simply for the purpose of locking them up and benefiting themselves. He had been engaged in mining speculations, but in every instance he had been associated in those speculations with those who had been engaged in a bona-fide manner in developing the country. There was a difference between legitimate enterprise of that description and a mere speculative locking up of the lands, of which they had to complain so much. It had been proved by geological authorities — by the Rev. W. B. Clarke and others — that there was in this colony an enormous area of undeveloped coal lands, but they knew that they were held by persons who were simply holding them until they could benefit themselves from the enterprise of others. The laws of the country were wrong, inasmuch as they did not provide against that sort of thing. A mining speculator, if he did not improve his land and develop it, should not be allowed to continue to hold it. (Hear, hear.) There were hundreds of thousands of acres held in the district he represented—and in Newcastle, Shoalhaven, and Illawarra—for mere speculative purposes. The holders were simply biding their time for an opportunity to sell out to either English or local capitalists intending to make a fortune out of what the State should have a share of. He considered that a measure should be brought forward to provide for mining on private property. (Applause.) He quite agreed with the Victorian law which provides that miners might go on private property and develop the riches to be found underneath the surface without paying a royalty to the owner of the surface. (Cheers.) All that miners that went on that kind of land should pay the owner for was any damage done to the surface, for which he should be compensated. (Hear, hear.) Up in the Mudgee district men had made fortunes by simply charging a royalty to miners who went upon the land, and who, in some cases, had to pay a royalty of 2s. 6d. and in others 5s. per oz. for the gold obtained. It was clearly wrong that the benefit of any unearned increment, taken from below the surface, should go to the owner of the surface; the State should have it. (Cheers.) If under these circumstances fees were paid to anybody, they should be paid to the State, and to the State alone. (Loud cheers.)

The resolution was carried unanimously.

A POLITICAL UNION.

Mr. GALE moved—"That, in order to confront the dominant influence of the pastoral and importing interests, the farmers, manufacturers, miners, and industrial classes, should combine in political union for self-defence, and the promotion of the welfare of the community at large." He thought that the necessity for the adoption of that course was so self-evident they need waste no time in argument upon the proposition. (Hear, hear.)

Mr. N. M'DONALD, of Corowa, seconded the resolution, and in doing so said that it was hardly necessary to say anything in favour of that motion, as an almost unanimous spirit had been shown in the discussions which had taken place. (Hear, hear.)

Mr. HEYDON, in speaking in support of the resolution, said that the reasonable compromises which were some time ago arrived at by the free-selectors in regard to their proposals bearing upon the land question, had been perverted to their own ruin. The half of the run which they consented to being granted to the squatters had been taken up, but the claim of the free-selectors in regard to the other half had been utterly disregarded. The consequence was that the selectors found that in the Land Act of 1884 they had a far more pernicious measure than were the laws which preceded it. The selectors had now come to the conclusion that a union of the people against a very strong minority was absolutely necessary. A lesson had been taught for their instruction in Victoria. It was only by union there, and not until there had been a prolonged and sustained fight, that the victory was gained. (Applause.) What the central committee of the Land and Industrial Alliance would understand if the conference adopted that motion was, that they would be authorised to associate in political campaigns with other bodies whose views were consonant with that motion. There had been a free trade league formed—not openly, but secretly; he had been told of the establishment of it by a gentleman who was asked to join it. The Central Committee did not, of course, ask authority to join in political association with that body in any campaign. That resolution would enable the Industrial and Land Alliance to unite the strength of the town with the strength of the country. If that resolution were carried it was contemplated to have a map of the colony prepared within a reasonable time prior to the general election, showing the places at which organisation should be established for the carrying on of the elections in the interests of the people—in carrying on the campaign in such a way as to secure a Parliament consisting of Liberal members. (Cheers.) It was absolutely necessary to do something at the present crisis. More than one-half the wealth of the colony had been given away for 15 years to one-thousandth part of the people. If that policy was ever to be undone or to be confirmed, it would be in the coming Parliament. He would be surprised if the people did not wake up and see how little land this beautiful system had left for them. It was supposed that there would under that system have been 40,000,000 acres available for selection; but the story told the other evening by the two men from South Australia, who had in their pockets £1000, and wanted to make homes on 500 or 1000 acres, gave the conference an example of what land was available. If that did not open the eyes of the country, then the country did not deserve free institutions. (Applause.) He did hope that every man in that room would make himself an apostle of these things in his own district, and he trusted that the waves of influence going from that room would circle wider and wider until they extended throughout the colony. Under any circumstances let them try the experiment of a liberal Parliament. (Cheers.) He subsequently recommended that at the forthcoming general elections they should in most cases make the support of the proposed Union conditional upon candidates pledging to support the abolition of the Land Act and the establishment of the payment of members. In places where there was a general feeling in favour of protection they might add that to the requirements of the Union.

Mr. GEORGE RANKEN, who had been induced by one of the delegates to come to that meeting, gave an expression of his views to the conference. He dwelt upon the value of the land maps prepared by himself, working in conjunction with Mr. Morris, and contended that if those maps had received more careful consideration some of the things now complained of might have been avoided. He was of opinion that the Land Act as originally framed was a good measure, but that the right man had not been selected to carry it out. He thought that instead of simply stopping auction sales all sales of land should have been stopped until the bill had emerged from the Legislature in its complete form, and that if that had been done an enormous amount of peacocking would have been prevented. Amongst the good features of the new Act was the stoppage of auction sales, and the adoption of the principle of local administration. He had always been an advocate of decentralisation, and he believed that the country would reap immense benefits from it.

Mr. Targett, Mr. A. Crawford (of Urangeline), Mr. A. M'Callum, Mr. A. Miller, Mr. Clemesha (of Gunnedah), Mr. M. Tully (of Wheeo), Mr. A. H. Sampson (of Manilla), Mr. E. W. O'Sullivan, and Mr. Bailey also supported the motion.

The resolution was then put, and was carried unanimously.

The conference then adjourned for lunch.

ANOTHER SUPPORTER.

On resuming, the chair was temporarily occupied by Mr. Gale. Before the business was proceeded with

Mr BAILEY expressed the gratification he felt at being able to announce the conversion of one of their members of Parliament, Mr. W. J. Fergusson, to their principles. He had during the period of adjournment had a conversation with Mr. Fergusson who had come to the conclusion that payment of members was absolutely necessary. (Hear, hear.)

THE PATENT LAWS.

Mr. GALE (acting chairman) informed the conference that their chairman had immediately before the adjournment took place promised Mr. Foote to allow him to submit to the conference on reassembling two motions. One at least was not in any way contemplated in their programme, but as Mr. Heydon had promised to allow it to be submitted he would call upon Mr. Foote to proceed with it. At the same time he was of opinion that the voice of the meeting should have been taken before any promise had been made in that matter.

Mr. W. M. FOOTE then moved,—"That, in order to encourage to the fullest extent the inventive ingenuity of the colony, this meeting considers it to be of the highest importance that the existing patent law should be so revised as to afford adequate protection to colonial inventors at a cost within the reach of all." Having urged some reasons in support of the motion,

Mr. W. T. CRICK and other members of the conference opposed the passing of the motion, principally on the ground that it was not included in the business for which the conference was convened. They urged that if they adopted that motion they would have to entertain any others which were brought forward; and these, if adopted, would so enlarge their operations as to weaken their influence in the promotion of those special objects which they had agreed upon.

Eventually the resolution was shelved by "the previous question" being moved and negatived.

SCHOOLS OF MINES, &c.

Mr. FOOTE next brought forward the following resolution:—"That this meeting is of opinion that Schools of Mines and Schools of Agriculture should be established throughout the country, to afford facilities for the people to study the best means of utilising its natural resources, and that a Minister for Agriculture should be added to the Executive."

Similar objections to those which were applied to the resolution relating to the amendment of the Patent Laws were advanced, and it was decided that the conference would not entertain this motion.

Mr. FOOTE was, however, permitted to express his views regarding both motions, and he expressed it as his determination to continue to advocate the passing of those resolutions, in the hope of ultimately being successful.

The conference then went into committee, and the reporters withdrew.

THE PLATFORM OF THE ALLIANCE.

The alliance in committee resolved upon the following platform:—Repeal or radical amendment of the Land Act of 1884, reciprocity or fair trade for farm produce and other colonial industries, and payment of members; no candidate to be considered a candidate of the alliance unless he advocates at least two of the above principles, of which opposition to the Land Act must be one. The desirability of establishing a paper to represent the views of the alliance was then discussed. It was notified that a new evening paper to do this was about to be started, and the debate on the matter was adjourned till this morning. The conference will terminate this evening with a banquet at Compagnoni's.

COMMERCIAL.

PRODUCE MARKET.—MONDAY.

At Darling Harbour terminus this morning good supplies of wood and forage were offered. The sales were fairly attended by the trade. The quality of forage forward was chiefly of medium sorts, with but a few prime descriptions. Buyers only purchased sparingly, and the market remains excessively dull. Hay, straw, and chaff were weaker. The demand ruled active for all descriptions of wood. On the wharfs there was a fair supply forward from the Northern and Southern rivers and Victoria. Business in general was fairly animated, and the various lines sold at late rates. The following prices were realised at Darling Harbour sales:—

Wood.—Large market. All descriptions sold with freedom at per ton:—Billet wood, 11s 6d to 14s; bundle, 13s to 18s; foot, 14s to 16s; bakers', 12s to 14s 6d.

Hay.—Good supplies. Market easier and excessively dull. Buyers' demands chiefly confined to prime descriptions. Other sorts neglected. Oaten, in bundles, 3s 3d to 4s 5d per cwt.; extra prime lots at 4s 9d to 4s 11d; bales, 3s 6d to 4s 7d; truss, 3s; lucerne, in bales, 4s; oaten and wheaten, in bundles, 3s 6d to 3s 8d; bales, 3s 7d; lucerne and oaten, in bales, 2s 10d.

Straw.—Fair consignments to hand this morning. Prices weaker. Moderate demand at 2s 1d to 2s 5d per cwt. for clean in bundles; one extra-prime lot realised 2s 8d.

Chaff.—Good supplies, and prices declined. Oaten, in bags, 3s 6d to 4s 6d per cwt.; straw, in bags, 2s 10d; mixed, in bags, 3s 6d.

On the wharfs the following are the wholesale quotations:—

Maize.—Stocks augmented by additions from the Macleay, Clarence, and Manning rivers to hand yesterday and this morning. Market steady, at 3s per bushel.

Oats.—Market well stocked, and prices exhibited no improvement. Demand slack at 2s 1d to 2s 3d per bushel for feed. Little or no inquiry for seed, for which to 2s 6d is quoted.

Barley.—This market displays no new feature, but remained inactive. Prices nominal at 3s to 3s 3d per bushel for Cape seed.

Bran.—A Victorian addition to stocks received last night. Supplies equal to the requirements. Moderate demand at 12½d per bushel.

Pollard.—Quiet sales at 12½d per bushel.

Hay.—Stocks on the wharfs strengthened by moderate consignments received from the Hunter River this morning. Wharfs well stocked. Trade was quiet. Prime lucerne, £4 5s to £4 10s. per ton; other qualities from £2 10s to £3 15s.

Chaff.—1361 bags from Victoria to hand last night, and together with stocks on hand buyers' requirements are amply met. Victorian at to £4 15s per ton.

Onions.—The balance of the previous week's arrivals supplemented by 433 bags forward from Victoria last night. Demand improved, and market firm at £4 5s to £4 10s per ton.

Potatoes.—A small consignment from Victoria received this morning, but the market is fairly stocked by previous shipments. Market firm, and selling steadily at £3 15s for Circular Head; New Zealand, £3 5s to £3 10s.

Butter.—Stocks replenished from the Southern ports yesterday. No change, standard quotations of Illawarra being 1s 6d per lb. for keg; roll, 1s 9d; intercolonial packed, to 1s 3d.

Cheese.—823 from the Southern ports yesterday. Fair demand for colonial at 7d to 8d per lb.; special brands to 9d.

Bacon.—Market amply supplied, and slow sales at 8d per lb. for hand-cured Southern; machine-cured, to 7d; heavy and rough, from 6d; hams, 10d to 1s 1d.

Lard.—Finely rendered in bladders moving off slowly at 7d to 8d per lb.; in bulk, 4d to 6d.

Honey.—An American supply to hand yesterday. Good and clear at 5d to 5½d per lb.; other sorts from 3½d.

Beeswax saleable at 10d to 1s per lb., according to quality.

Eggs.—Additions to stocks from the Northern and Southern rivers this morning. Demand slack at 1s 2d to 1s 3d per dozen.

Poultry.—Supplies to hand this morning principally from Northern rivers. Moderate sales of all varieties at per pair:—Fowls, 3s to 4s; ducks, scarce, quoted to 7s; geese, none offering, quoted to 9s; cock turkeys, 10s to 14s; hen-turkeys, 7s to 9s.

FAT STOCK MARKET.

At the Homebush fat stock sales to-day, 674 head of cattle were yarded. Owing to the short supply forward, prices advanced from 10s to 15s per head. The best lot of bullocks averaged £10 7s 7d, medium £8, and inferior from £6 7s per head; cows at proportionate rates. 9451 sheep were penned. Competition was animated, and owing to supplies being insufficient for requirements, there was a rise of 1s per head. The best lot of merino wethers sold at 18s 9d per head, others from 10s 3d per head; a few crossbred wethers at 14s per head; lambs at 9s 4d per head. The following sales were reported:—By Mr. John Bridge.—A small draft for C. Newman, at to £9 for bullocks; cows, £5 18s; 14 bullocks for P. Russell, to £8 8s. By Messrs. Harrison, Jones, and Devlin.—257 wethers (A. Booth), 13s 9d: 200 wethers (M'Kenzie Brothers), 10s 11d to 11s; 270 wethers (C. Vandermaal), 11s. By Messrs. Pitt, Son, and Badgery.—89 bullocks (Woods, Ferguson, and Co.), at £7 15s 9d; 85 cows (Woods, Ferguson, and Co), at £6; 11 bullocks (J. M'Donnell), at £9 9s; 6 bullocks (C. M'Donnell), at £6 8s 8d; 419 wethers (Kater Bros.), at 13s 5d to 13s 8d; 32 wethers (Kater Bros.), at 12s 11d; 414 ewes (Donnelly Bros), at 7s 6d to 7s 8d; 6 ewes (Donnelly Bros.), at 9s 4d; 10 wethers, tops (S. agents), at 12s 8d; 60 wethers (S. agents), at 10s 8d; 30 ewes (S. agents), at 10s 2d. By Messrs. Wilkinson, Graves, and Lavender.—700 merino ewes, for (Messrs. Dight and Mackay), from 11s 4d to 15s 4d, 370 at 10s 2d to 10s 6d; 250 light weights, 9s 3d to 9s 4d. By Messrs. Dransfield Brothers.—10 bullocks (R. Rouse), at £9 4s; 13 ditto (G. Rouse), at £7 2s; 100 sheep, tops (A. Dempsey), at 12s 9d to 12s 10d; 100 ditto, seconds (A. Dempsey), at 11s 3d to 11s 9d; 100 ewes and lambs (A. Dempsey), at 9s 4d to 11s; 117 sheep, tops (W. V. Cooper), at 12s 4d to 12s 6d; 72 ditto seconds, at 10s 9d to 10s 11d; 400 ditto (A. G. D. Huthwaite), at 10s 5d; 300 ditto (Southern agents), at 10s to 10s 4d. By Messrs. Joseph Leeds and Co.—51 bullocks (Messrs. Cleeve, Fink, and Co.), to £12, averaging £10 7s 7d. By Messrs. T. Sullivan and Son.—56 bullocks (Mr. Geo. Gibson's), averaging £6 6s 8d; 35 cows (same owner), at £5 10s 4d; and 471 merino wethers (Mr. Jonathan M'Lean's), at 10s 6d; 100 seconds (same owner), at 10s.

MINING INTELLIGENCE.

(BY TELEGRAPH.)

(FROM OUR OWN CORRESPONDENTS.)

MOUNT M'DONALD, MONDAY.

The following are the results of the crushings for the past month:—Patterson and Co., north of the Balmoral, 3 tons of stone for 5oz. 11dwt. 9grs. of gold; Evans and Peel, tributors on Balmoral, 24 tons, 95oz. 19dwt. 16grs.—this is turning out a splendid tribute, and appears the best yet opened on the field, showing an immense vein; Woman's Lease, 26 tons for 59oz. 3dwt. 6grs.—the Woman's Lease appears to have seen the best of its days, and is likely to have a spell; M'Cort and Co., first crushing, 36 tons for 59oz. 16dwts. 4grs.—this lease is looking capital; 8 tons trial from South of field for 3oz. Eureka, 60 tons for 26oz. 3dwt. The Eureka has also run the best of its days unless something fresh is struck in the walls or at a depth; the labour is reduced to four men. Oliver's freehold and leasehold, with Balmoral included, have put through a quantity of sand for 47oz. 7dwt. 10gr. The old Pig and Whistle is at present looking very well. Fresh hands were put on this morning on Grant's Amalgamated. There have been two parties of tributors. One lot "gives it best;" the other has about ten tons of stone scraped together, and will commence crushing to-day. It has taken three men eight weeks to get this lot out, as they had to remove such an immense quantity of rubbish to follow the narrow leader. The total escort for the month is 297oz., 21grs., and all through the field is holding out a fair prospect.

TEMORA. MONDAY.

The S. A. Quartz-mining Company have crushed 70 tons of stone for 80oz. of smelted gold. Messrs. Bushell and Allan have obtained some rich specimens in Lucas and Penman's old reef claim.

DISCOVERY OF A LARGE IRONSTONE LODE.

The following communication from the Warden at Silverton has been received by the Under-Secretary for Mines:—

"Warden's Office, Silverton, July 24, 1885.

"Sir,—I have the honour to inform you that a very large ironstone lode has been discovered on the Corona Station, distant about 60 miles from here and 35 from Purnamoota. It resembles in a very marked degree the now celebrated Broken Hill lodes, only of much larger dimensions. It is now traced for upwards of 12 miles, the whole of which length has been applied for by different parties since the 16th ultimo in 47 M. L. applications. The lode in one place reaches the extraordinary width of over 400 yards. No work has yet been done on it, but surface assays have given from 2oz. to 24oz. per ton of silver. Water is very scarce there now, and the same remark applies with equal force to all parts of the field. If rain does not soon fall work in several parts of the district must cease. As several J. P. applications for land situated on Corona run have been sent me from the Mining Department for the usual report, I shall have shortly to visit this land, after which I may be able to furnish you with a more detailed description of this lode. "I have, &c.,

"NYMAN BROWN, Warden."

The mining manager of the Long Tunnel Extended, Walhalla, reports, under date July 30:—"No. 4 intermediate level: The stopes above this level are looking well, the reef being nearly 2 feet thick, solid and good stone. No. 4 level north: extended 8 feet (4 men); total, 234 feet. No. 5 level: Stopes are looking very well; the rise from the top stopes is now up 40 feet, and carrying up a reef over 12 inches thick of fair quality stone; the indications are good for the reef to continue up much higher. No. 7 level: Stopes are yielding a good quantity of stone for crushing. No. 8 level north: The contractors have driven 12 feet; total, 294 feet; reef continues about 2 feet thick; the stopes above are producing stone of usual quality. Shaft has been sunk 5 feet and timbered: total depth below plat, 115 feet. Will finish in a few days more. The sinking is much harder."

The manager of the South New Zealand Gold-mining Company, Limited, under date 24th July, reports as follows:—"During the past fortnight the following work has been done in the mine, viz.: The south level has been driven 10 feet, total 141 feet; No. 1 stope has been advanced 23 feet, No. 2 15 feet, No. 3 16 feet, No. 4 16 feet; fair washing stuff is still being raised from throughout the stopes; very good gold was met with in the top of the last stope, where I intend rising on the next week. The north stope has been advanced 7 feet. During the fortnight 156½ tons of quartz has been crushed for a yield of 394oz. 16dwts., or an average of over 2½oz. to the ton."

The mining manager of the Press Reform Gold Mine, Lucknow, writes:—"Nothing fresh to report in the mine this term. The various workings are all on the usual class of stone suitable for crushing and concentrating. 85 bags of ore on hand ready for shipment, averaging about 1 oz. each. I have raised 80, thrown out 11, and reduced 150 tons. New 10-ton boiler, about half bricked in. Other contracts progressing well."

The mining manager of the Alexandra Hill Gold Mining Co., No Liability, Charters Towers, Queensland, under date 25th July, reports:—"I have driven number three level six feet, total distance from shaft 311 feet. The reef here is about one foot thick, and of fair quality. I have started a stope over this level, about 30 feet from face, upon one foot of stone, which looks well. No sinking was done in the shaft during the fortnight, as all hands were busily engaged taking out stone, but work will be resumed there at once, and I hope to fix the pump and start another level during the ensuing fortnight. I am still stoping over the three level and a reef two feet in thickness and of fair quality. The winze is down 12 feet, and carries some very good-looking stone. We finished crushing 18th instant, 418 tons gave 753oz. There are 30 tons in the paddock."

The mining manager of the Cravens Caledonian Gold-mining Company, No Liability, reports, under date July 20:—"Since last report I have continued the main drive, which is now in a total distance of 165 feet, 48 of which have been driven during the last six months. I stopped the main drive three weeks ago for the purpose of extending the 400-feet level, which has been cleaned out and extended 18 feet, making a total of 82 feet. The reef in this level and in all the stopes is about the same, both in size and quality, as stated in my last report. We have done a quantity of dead work since last crushing, which was very much needed. We new-timbered the straight shaft for 100 feet and battened the whole of it, and have also put 200 feet of new skids in the underlays and new ladders. We have sunk the straight shaft another 8 feet. There is now about 65 tons of quartz at grass, and the mine is in good working order."

The mining manager of the Lubra Silver-mining Company, No Liability, Silverton, reports, under date 24th July:—"The shaft is down 28 feet on the underlie, and there has been one ton of ore taken out since the commencement of the sinking. Tenders have been called for sinking the shaft another 50 feet from the present depth."

THE LATE EX-PRESIDENT GRANT.

Yesterday afternoon a preliminary meeting of American citizens residing in, or visitors to, Sydney was held at the offices of Mr. Gilderoy W. Griffin, United States Consul, Spring-street, for the purpose of taking steps towards recognising the merits and services of the late president Grant. The gathering, being altogether a preliminary one, was not very large, but at the same time those present were representative persons in every sense of the word. The following letter was read from the Attorney-General, the Hon. W. B. Dalley, Q.C., in response to a communication sent by Mr. Griffin:—"Colonial Secretary's Office, Sydney, 3rd August, 1885. My dear Consul,—I shall esteem it a great privilege to attend, as you desire, the meeting which your American fellow-citizens propose to hold for the purpose of expressing their sympathy with the Government and people of the United States on the melancholy loss of the distinguished man to whose military genius the preservation of the great Republic was mainly due. If I can be of any service, however humble, in testifying the admiration of the people of this colony of the noble, soldierly character of General Grant, and their sense of the loss which his Government has sustained by his death, I shall be much gratified. I am, my dear Consul, very sincerely yours, WILLIAM BEDE DALLEY." It was also intimated that the Primate of Australia (Dr. Barry) had, in response to a communication, expressed his sympathy with the movement and with the American nation under the loss they had sustained by the death of General Grant. Dr. Barry had suggested that the demonstration be made as widely representative as possible of all classes, nationalities, and creeds. He had furthermore expressed his willingness to hold a memorial service at the Cathedral, subsequent to the proposed demonstration. The following gentlemen, with power to add to their number, were selected from the meeting as a committee to undertake initiatory details, viz.:—Consul Griffin (permanent chairman), Messrs. A. D. Shepherd, Livingstone Hopkins, Donald Manson, J. G. Coates, and H. Shaw Smith. It was finally decided to hold another meeting at the Royal Hotel, George-street, at half-past 7 o'clock this evening.

The steamship Killarney, from Foochow, with a full cargo of the new season's teas, entered the Heads at half-past 10 o'clock yesterday forenoon, and after being passed by the port health officer, came up to the Grafton Wharf, where she was safely berthed by noon. The Killarney, it will be remembered, left here last year with wool, &c., for London, where she arrived in due course and discharged her cargo. Then she proceeded to Antwerp, where she took in some cargo, and then went on to Bordeaux, where she filled up with wines, &c., and left for Penang. After completing that charter, she voyaged on the coast of China until taken up for her present voyage. Captain Henry O'Neill is still in command, and brings the vessel into port in capital order. Mr. Cronin has been succeeded in the position of chief officer by Mr. Ferguson, who was in the Killarney some nine years ago. The voyage has been marked by a continuance of stormy weather, strong head winds and seas prevailing during the greater part of the time, and particularly along the coast of this colony. The consequence has been that the time occupied on the trip was several days longer than was expected. Owing to the delay thus caused it was probable that the Adelaide portion of the Killarney's freight, some thousand tons, will be transhipped, and the steamer will be taken into dock to be cleaned and painted. The Killarney left Foochow on July 11, and came by the outside passage for steamers. During the storms she encountered, water in large quantities was taken on board, both fore and aft, but no damage was done.

The steamer Currajong left Rockhampton at 10 a.m. on the 27th ultimo, and arrived at Brisbane on the 29th at 11.45 a.m. Left again on the 30th at 12.30 p.m.; passed Smoky Cape at 1.15 a.m. on the 2nd instant, and entered Port Jackson at 3.50 a.m. on the 3rd, arriving alongside the wharf at 4 a.m. Experienced strong S.W. gale with heavy sea to Smoky Cape, thence to arrival fresh to moderate S.E. winds and clear weather.

The steamer Hesketh left Townsville at 5.30 p.m. on the 22nd ultimo, arrived at Port Mackay at 5 p.m. on the 23rd, left again at 11.30 p.m. on the 28th; Cape Moreton light abeam at 7.15 p.m. on the 31st, Seal Rocks at 5.45 p.m. on the 2nd instant, and entered Sydney Heads at 5.15 a.m. on the 3rd. The Hesketh had fresh southerly winds to Percy Island; thence to South Solitary strong S.S.E. winds, heavy rain squalls, and heavy head sea; thence to Nobby's fresh southerly wind; thence to arrival light west winds and fine weather.

The steamer Rockton left Levuka on July 25, at 6.30 a.m., and arrived at Suva at 10.45 a.m.; left same day at 5 p.m.; passed Mount Washington at 11 p.m., and entered Havannah Pass on the 28th at 10 a.m., arriving at Noumea at 1.30 p.m. After taking in passengers and cargo, left Noumea on the 29th at 6.30 a.m., cleared Bulari Pass at 8.50 a.m., and arrived at the company's wharf, Sydney, on 3rd instant, at 7.30 a.m. Experienced light variable winds and fine weather to Noumea, thence fresh south to south west winds with squally weather till the morning of the 2nd, when the weather moderated, and continued fine to port.

The barque Lois left for Newcastle last night with original cargo from Port Augusta.

The ship M'Diarmid, Captain J. F. Constable, has been fixed to sail for Portland, Oregon.

The Tasmanian Steamship Company's steamship Corinna arrived at Launceston on Sunday morning.

The barque Victoria Cross will be towed from Dalton's wharf to the stream to-day.

The schooner Emma Fisher, 24 days out from Fiji, put into Forster yesterday morning, short of provisions, and wished to be reported all well.

The Orient Company's R.M.S. Garonne left Aden for Australian ports on the 29th ultimo.

The Orient Company's chartered steamship Belgic, with 516 immigrants, left Plymouth for Sydney on the 30th ultimo.

The steamer Ranelagh left Melbourne on the 1st instant at 1.45 p.m., passed Wilson's Promontory at 1.20 a.m. and Green Cape at 7 p.m. on the 2nd, Cape St. George at 6.25 a.m. on the 3rd instant, and arrived in Sydney at 2 p.m. same date. Experienced light easterly winds and fine weather to Wilson's Promontory, thence to Green Cape moderate N.E. winds, thence to port fresh head winds with fine clear weather.

The barque Maude was moved from the Circular Quay to the stream yesterday.

The German steamer Pemptos was berthed at No. 1 Jetty, Grafton Wharf, yesterday, where she will discharge her cargo from Hamburg, Antwerp, and London.

The steamer Glanworth, from Cooktown via ports, arrived in Brisbane at 8 a.m. on the 31st July, left at 4 p.m. same day, cleared Cape Moreton at 9.22 p.m., passed South Solitary at midnight on August 1, Smoky Cape at 5.23 a.m. on the 2nd, Seal Rocks at 3.55 p.m., and entered the Heads at 1 a.m. on the 3rd, arriving at the company's wharf at 1.45 a.m. Experienced fresh southerly gale, with high sea and heavy rain squalls to Smoky Cape, thence strong southerly winds to Seal Rocks, and moderate S.S.W. winds with S.E. swell and fine weather thence to port.

The Norwegian barque Rollo is to be moved from Johnston's Bay to the stream to-day.

To-day the German steamer Samoa will be taken from Johnston's Bay to an anchorage in the stream.

The steamer Bortonius, from Clarence River on the 1st instant, at 7 a.m., arrived in Sydney on the 2nd instant at 10 p.m. Experienced fresh southerly breeze and heavy head sea to Smoky Cape, thence to arrival variable wind and heavy S.S.E. swell. Cargo: 670 bags maize, 100 head fat cattle.

The steamer Rosedale passed the Manning bar at 12.30 noon on the 2nd instant, and entered the Heads at 5 a.m. on the 3rd. Experienced light variable wind, with S.E. swell, throughout the passage. Cargo: 40 bags potatoes, 330 bags maize, 60 sides bacon, 80 hides, 260 pigs, 16 coops poultry, 60 cases eggs, 40 packages sundries.

The steamer Tarawera, from New Zealand ports with mails, passengers, and cargo, left Auckland at 5 p.m. on the 28th ultimo, arrived at Russell early next morning, and sailed again at 4 p.m. same day, arriving in port at 1 o'clock yesterday afternoon. The Tarawera experienced a heavy S.W. gale and high head sea till the 2nd instant, and moderate weather thence to port.

On June 13 there was launched from the shipbuilding yard of Messrs. Robert Duncan and Co., at Greenock, an iron sailing barque of 1300 tons, and of the following dimensions:—Length, 230 feet; breadth, 36 feet; depth, 21 feet 6 inches. She has been built to the order of Mr. C. T. O. Guthrie, for his Village Line of sailing ships, Glasgow, and is a sister ship to the Minnyhive, lately launched from Messrs. Duncan's yard, for the same owner. She is intended to engage in the East Indian trade. On leaving the ways she was named the Ruthwell, and shortly after the launch was towed to the harbour to be fitted out. The Ruthwell was to leave for Sydney on July 30.

The following is the finding of the Adelaide Marine Board as to the circumstances attending the loss of the barque Fannie M.:—"The Marine Board is of opinion that the stranding of the barque Fannie M., off Kingscote, Kangaroo Island, was caused by the thick weather which obscured the land and the spit, and by the existence of an exceptionally high tide, which misled the master in taking soundings when running parallel with the spit. Shortly before the stranding the vessel broached to in a heavy squall, and was unable to pay off. The master, S. H. Stockton, cert. 28639, London, appears to have been careful in using the lead and in handling his ship generally, and the board is of opinion that he is not to blame for the casualty. There is no evidence to show how the fire originated. The board have no reason to suppose that it was caused by spontaneous combustion of the cargo, or that the ship was wilfully set on fire. It may have been occasioned by the breakage or explosion of the binnacle lamp in the after cabin, where the evidence shows the fire was first observed."

The s.s. Nemisis arrived from Melbourne last night. She cleared Port Phillip Heads at 7.30 p.m. on the 1st, passed Wilson's Promontory at 5.50 a.m. on the 2nd, Gabo Island at 1 a.m. on the 3rd, Cape St. George at 5.20 p.m. that day, and entered Sydney Heads at midnight. Experienced light variable winds and fine weather throughout the passage.

COLONIAL GOVERNMENT SECURITIES.

N. S. Wales Funded	—	—	Debentures, due 1902	—	—

The nineteenth half-yearly meeting of the New South Wales Protestant Hall Company, Limited, was held this evening; Mr. Abigail, M.L.A., in the chair. The report showed that the receipts had risen to the grand total of £1392, as against £1363 for last year. The directors reported that from the rents of the new building a balance was left to the good. All the shares had been disposed of, and the directors had had under their consideration a scheme for issuing further shares, but nothing definite had been decided upon at present. The report was adopted, and a vote of thanks passed to the directors.

The half-yearly report of the Wollongong Gaslight Company, Limited, showed a net profit of £277, from which the directors proposed to pay a dividend of 6d. per share (£1 each), which would absorb £150; to pay £100 from off preliminary expenses account, and carry forward the balance.

Elsewhere appears the prospectus of the Teralba Coal-mining Company, which is being formed, with a capital of £120,000 in £1 shares, to develope a coal-mining property in the Newcastle district. The bulk of the shares have been already subscribed.

Mr. J. J. Weston reports that the Lymington Wallsend Coal Company has been floated, having a capital of £60,000, to work 1280 acres of leased land and 200 acres purchased land, situated about eight miles from Newcastle, and through which the Waratah-Homebush railway passes.

In the Import markets to-day the month's business opened with only moderate animation; but, with fairly good reports from the country districts, there is likely to be an improvement in trade ere long. The breadstuffs market to-day disclosed no new feature; trade moderate in amount, and prices firm. The feature of the day was the arrival of the new season's teas. The Killarney, with 1700 tons for Sydney and 1000 tons for Adelaide, reached port this morning, and by the afternoon many of the importers had their musters opened and examined, and in one or two instances part of their shipments in store. Opinions differ as to the quality of the tea; whilst some say that their shipments are quite equal to those of the new teas last year, others regard them as scarcely so good, either in appearance or liquor. Despite complaints of an unprofitable experience, although less frequent in the past than in the preceding season, some new firms are included in the steamer's manifest; and in this, as in other trades, commercial enterprise promises to be exhibited to an extent fully compatible with the market requirements. It is announced that two of the shipments, comprising about 3500 packages, are to be offered at auction by Messrs. Fraser and Co., and one shipment of 2600 packages by Messrs. Harris and Ackman, on Wednesday next, and as the catalogues will comprise all grades, from common to finest, the trade will have an early opportunity of making their purchases. Privately we hear that samples have been taken, but so far no sales of importance have transpired. It is thought the early auction sales will militate to some extent against the transaction of private business, at least until after Wednesday next. The steamer Airlie with the Melbourne shipment of new teas passed along our coast yesterday, and is likely to reach that port to-morrow. Foochow intelligence to the 10th July shows that the arrivals of congou to date were only 368,000 chests, against 422,000 chests to the corresponding date of last year; the settlements amounted to 231,380 chests, against 256,000 chests; whilst the stock held was 136,620 chests, against 166,000 chests in the same period last year. Of scented teas, 39,000 boxes had arrived, of which 23,777 chests had been settled, leaving a stock of 15,223 boxes. The arrivals at the corresponding period of last year reached a total of 41,000 boxes, the settlements 29,000 boxes, and the stock 12,000 boxes; from which it appears that, though the arrivals and settlements had been smaller, the stocks were larger than at the same time in 1884. These figures are from the market report of Messrs. Russell and Co., who also report on the date named as follows:—

"Owing to an attempt on the part of the native teamen to alter the trade customs of the port with regard to the time for payment for teas bought, also the weighing of teas, and which was objected to by foreign buyers, no samples of the new crop were shown until the 15th ultimo, when the difficulty was adjusted. Buying commenced on the 19th ultimo, 13 days later than last year. A large business has since been done, considerably exceeding that of the last two years in the same number of days. As usual the bulk of first purchases were for first steamer to London, for which rather high prices were paid, but a decline of 1 to 3 taels was quickly established, since when rates for good medium and fine teas have been fully supported. Common and flavoury grades are 10 per cent. cheaper than at first, and are now about on a par with last years' prices for first steamers to Australia. Tael costs have generally ruled well below last years, but the inferior quality of the crop fully makes up the difference. Arrivals of first crop teas are less than last season's, and it may be assumed that the first and second crops together will show a deficit of from three to four millions of pounds. It is evident that unusually bad weather must have prevailed during the picking time, for not only in appearance and style of leaf, but also in liquor, is the crop inferior to last year's. Panyongs are again the best teas of the season. Foochow quotations are:—Siftings and broken leaf, 3½ to 7½ taels short; low common, 8¼ to 9½; good common, 10 to 11½; flavoury, 12 to 14; medium, 15 to 17; good medium, 18 to 21; fine, 22 to 26; finest (Paklums up to 49), 28 to 33. Scented teas are well made, strongly scented, and show good value. Settlements of Orange Pekoe are 23,777 boxes at from 18 to 23 taels for good medium, 25 to 30 taels for fine, and 32 to 36 taels for choice. A few scented capers have found buyers at from 18 to 25 taels for fine. Exchange: On London, six months' sight credits, 3s. 7½d. to 3s. 7¾d.; 4 months' sight credits, 3s. 7¾d. Shipping: Under despatch, the s.s. Tamsui, for New Zealand ports, at from £2 10s. to £2 15s. per ton of 40 feet. The s.s. Airlie, for Melbourne, and s.s. Killarney, for Sydney, both leave to-morrow with full cargoes; rate of freight in both cases, £1 10s. per ton of 40 feet. S.S. Menmuir, engaged full at same rate, will leave for Sydney and Melbourne about 10 days later. The s.s. Port Jackson, Guthrie, and Venice are all circulated to leave about the end of this month, at £1 10s. per ton of 40 feet. Also s.s. Whampoa, for New Zealand ports, at same rates as Tamsui. The cargo of the Tamsui is estimated at about 948,000lb. tea to all New Zealand ports."

A moderate business is reported in Queensland and colonial sugars, of which stocks are increasing. The quantity in the bonded refineries, however, was reduced from 8070 tons to 7973 tons during the past week. For Dairymaid milk 6s. 6d. is now quoted. The candle market is unsettled; some importers are holding, and quote to 8d. for D.R.J.'s. The uncertainty prevailing as to the quantity coming forward makes it difficult to give quotations. In liquors, the day's trade was marked by nothing of very special interest, the transactions coming under notice being at about late rates. In metals we hear of the quittance of a quantity of galvanised iron at recent prices.

Messrs. Arkell and Douglas write from New York, on June 27, that prices of kerosene had been fairly steady until within a day or two of that date, when there was an advance of about ½c. per gallon. Niagara, 150° test, quoted at 13½c.; 130° test, 10½c.; Devoe's Brilliant, 110°, 10½c., in 1000 case lots. Faucet nozzle, 1c. per gallon extra. Turpentine had continued to rise, and was firm at 40c. to 41c.; but it was hardly expected the rise would be maintained. Lobsters, Eureka, 1·55 dollar; oysters, 97½c. to 1 dollar; dried apples, in half and quarter barrels, state per lb., 5½c. to 5¾c. The monthly shipments to the colonies included the following:—From New York for Sydney the C. P. Dixon, Edward Ridder, and Lottie Moore, with 2200, 4110, and 10,000 to 12,000 cases kerosene respectively; for Melbourne, the Wilhelm with 8200 cases; for Brisbane, the Lady Agnes, with 7025 cases; and for Wellington, the Troubadour with 3850 cases. From Boston for Sydney, the Hiram Emery with 3750 cases; for Adelaide, the Topdal with 8250 cases; and for Melbourne, the Colorado with 8000 cases.

Messrs. Harris and Ackman will offer at auction to-morrow (Tuesday) morning, sugar, oilmen's stores, &c.

At the Homebush fat stock sales to-day 674 head of cattle and 6450 sheep were penned. The market was firmer, cattle selling at from 10s. to 15s. per head, and sheep at 1s. per head.

The following is a return of colonial spirits at the bonded distilleries for the week ended Friday, July 31, 1885, in proof gallons:—

Description of stock, rum; stock in store July 24, 5336; since distilled, 4510; issued for bond, 9504; total issues during the week, 9504; rate of duty, 12s; stock in store July 31, 342.

The foreign sugar at the bonded refineries, for the week ended Friday, July 31, was as follows:—

AUSTRALIAN MUTUAL PROVIDENT SOCIETY.
Head Office, 87, Pitt-street,
Sydney, 27th June, 1885.

Dear Mr. Kelly,—It is a matter of current report that you hold policies for considerable amounts in the two American offices now transacting business in these colonies, and I know that the manager of one of these offices has stated that a Bonus Certificate received by you has disclosed results that "ought to be made widely known." The Bonus Certificate for the year 1884 attaching to your Policy, No. 134,245, with this Society will to-day be issued to you; and, as you are deeply interested in the Society, you will no doubt institute a comparison between the bonuses allotted by the three offices.

I shall be glad if you will be kind enough to favour me with particulars of the policies effected by you in the American companies, and of the bonuses allotted, in order that I may make a similar comparison. Personally I have little doubt of the result of such comparison; and I shall esteem it a favour if you will give me permission to make such result public.

Faithfully yours,
MORRICE A. BLACK, Actuary.

T. H. Kelly, Esq.,
67, Pitt-street.

Sydney, 3rd July, 1885.

Dear Mr. Black,—I hand you herewith results of the Equitable Life Assurance Society of the United States, and of the New York Life Insurance Company, for the year 1884, so far as I am concerned. The difference in the amounts of premium arises from difference in age, one being for 33 years and the other 34.

I have no objection to the publication of the figures.

Yours truly,
T. H. KELLY.

Morrice A. Black, Esq.,
Australian Mutual Provident Society.

The following are the particulars relating to the Policies on the life of T. H. KELLY, Esq., of Sydney, referred to in the foregoing correspondence:—

In each case the Policy is an ordinary whole life one; they were all effected in 1884. One annual premium has been paid on each, and one year's bonus allotted to each.

It is not thought necessary to make any comment on these figures. It is confidently believed that THEY CANNOT FAIL TO CONVINCE THE MOST SCEPTICAL of the SUPERIORITY of the Australian Society.

COMPARISON OF RESULTS.

Name of Office.	Amount Assured.	Premium Paid (One Year).	Bonus (One Year). Reversionary Addition.	Cash value.
Equitable of the United States	£10,000	£342 18 0	£97 0 0	£50 0 0
New York Life	5,000	285 2 1	58 15 4	33 17 0
Australian Mutual Provident Society	5,000	293 15 0	108 4 0	52 10 0

Name of Office.	Percentage on Premium paid of Reversionary Addition.	Cash value.
Equitable of the United States	£17 18 0	£9 4 0
New York Life	20 12 0	11 18 0
Australian Mutual Provident Society	36 16 0	17 18 0

The above figures ARE NOT ESTIMATES, but are the results of THE EXPERIENCE OF THE FIRST YEAR'S BUSINESS of the American offices in Australia.

M. A. BLACK, Actuary.

Australian Mutual Provident Society.
HEAD OFFICE—87, Pitt-street, Sydney,
4th July, 1885.

THE EQUITABLE LIFE ASSURANCE SOCIETY OF THE UNITED STATES.
Sydney, 21st July, 1885.

Dear Mr. Kelly,—

Absence and press of business have prevented my replying sooner to Mr. Black's letter in the public Press addressed to you.

With regard to the rates of premium charged by the two societies under table I. (whole life, payment until death policies), a comparison which has been initiated by Mr. Black, I may inform you that the average rate is lower in the Equitable than in the A. M. P., and consequently more assurance is given under that table in proportion to the premiums received in the former (Equitable) than in the latter (A. M. P.). Please refer to table.

Mr. Black lays great stress upon the fact that your policy with the A. M. P. was taken out some four months later than your policy with the Equitable. This, however, does not alter my comparison in the least, as, had your A. M. P. policy been taken out four months earlier, you would have been just as old, ACCORDING TO THEIR TABLES, as they take the age at NEXT birthday, and consequently this would not have altered your rate. My comparison is, therefore, not affected; therefore my tabulated statement showing £926 IN FAVOUR OF THE EQUITABLE IS NOT DISPROVED.

Mr. Black's tabulated statement, showing the nett cost of assurance with the A. M. P. to be £10 8s less than with the Equitable, is not to the point, as he credits the A. M. P. with a cash bonus of £105, and admits in a following paragraph that there is NO BONUS AT THE END OF THE FIRST YEAR! The following is the table as it should appear:—

	Annual Premium.	Cash Bonus.	Net Cost of Assurance.
A. M. P.	£587 10 0	No bonus 1st year.	£587 10 0
Equitable	542 18 0	£50	492 18 0

Nett cost of assurance with Equitable £94 12s less than with the A. M. P.

Mr. Black may have explained to YOU that your bonuses were DEFERRED AND CONTINGENT, but he did not so explain them TO THE PUBLIC, who would naturally have inferred from his first letter that they were similar to those of the Equitable and New York Life.

Mr. Black says that the question intending policyholders have to ask themselves in judging of the relative merits of the two societies is the nett cost of assurance? Truly so; £94 12s less with the Equitable than with the A. M. P.

Is a cash bonus of £105 on a £10,000 policy in the Mutual Provident, payment of which is deferred a year, more or less advantageous than one of £50 from the Equitable not so deferred? Less, certainly, when the premium paid the Equitable is £44 12s less than that paid the A. M. P., besides which the A. M. P. bonus of £105 is not only DEFERRED but it is CONTINGENT upon your surviving a fixed tontine period, the end of which you may never live to see.

"And what has Mr. Atkinson to say to the cash bonuses (double in amount of those in the Equitable) which you will receive each year for perhaps 29 years after the two years' probation have expired?" Mr. Black should know as an actuary that the probable duration of your life, as at the age at which you were accepted, is not 29 years. It is true you may outlive your expectancy on the one hand, but there is an equal chance of your never attaining it on the other. We can therefore only deal with your PROBABLE duration of life.

Mr. Black has formerly argued in the matter of tontines that it is gambling to sacrifice present profits (and tontining affects profits only, not the sum assured) for future results which you may never live to see. He now out-herods Herod by taking the other side of the argument for his own purposes. Mr. Black began by dealing with what he calls actual figures; but, unable to stand his ground on them, he turns to estimates, and assumes that your future bonuses with the A. M. P. will be double those with the Equitable. On what grounds? This is rather going beyond the "prophetic instinct" of the Equitable, at which Mr. Black gently sneers.

But if you wish to select a policy on the presumption that you will live 20 years, compare our non-forfeitable deferred bonus 20 years policies with the A. M. P. results:—

—	Sum assured	—	—	—
A. M. P.	£10,000	Bonus for 20 years at £216 per annum, £4320	£14,32[illegible]	but not payable till death, and on which the usual annual premium has still to be pd.
Equitable	10,82[illegible]	Estimat'd bonuses as per our books —£9,728	£20,550	Payable in CASH at the end of 20 years.

And where is the SUPERIORITY now?

The Equitable also gives the following options:—Estimated cash bonus at end of 20 years, £15,173, you keeping your policy for the original amount in force by continuing the payment of premiums; or (subject to a second medical examination) a paid-up policy would be given for (estimated) over £27,000.

"To say that there is any element of tontine in these facts is to force on me one of two conclusions. Neither of them is complimentary to Mr. Atkinson; so I refrain from stating them." What are these conclusions? And what is the difference between the A. M. P. deferred contingent bonus policies and our tontine and semi-tontine?

"And why should Mr. Atkinson complain of the publicity I have given to this matter?" I have made no complaint as to Mr. Black's giving publicity to our figures, but I certainly have of the ingenious and also unfair comparisons by which he has sought to prove the superiority of his society.

"Let it be once for all known that profit in a life office cannot be produced by any feat of legerdemain." I am quite in accord with this sentiment, but the expenses of new business in the A. M. P. (after allowing 7½ per cent. for collection of Renewals), added to the cash bonus and amounts paid in claims, come to more than 100 per cent. of the premiums received. Where does Mr. Black get the balance? From the old policyholders?

Rate of Interest £6 3s 1d. Yes; but in 1882 it was only £5 19s 3d. What is it going to be next year or the year after?

Percentage of expenses 16·9 A. M. P., 19·9 Equitable. Mr. Black obtains these figures by lumping together new and renewal business, and it is not necessary for me to explain that when so lumped they form no criterion as to the bonus power of a society. I can refer you to his own pamphlet—"The Progressive Policy of the A. M. P. Society Reviewed"—where he proves that of two Societies in our relative positions and the proportions of new business to renewals being as they are, the balance of profits would be in our favour. I refer you to it to confirm my statements.

Finally, Premiums being equal, should you die in the second year you would receive £926 more from the Equitable than from the A. M. P. Premiums being unequal, your nett cost of assurance is £94 12s less.

And had you taken a 20 years' policy with us, as above, you would receive some £20,000 with us in cash, instead of a policy worth some £14,000 (or possibly a little more with compound bonuses), payable at death; and on which you would have to pay annual premiums until you died.

Faithfully yours,
R. HOPE ATKINSON,
Manager.

T. H. Kelly, Esq., 67, Pitt-street.

AUSTRALIAN MUTUAL PROVIDENT SOCIETY.
Head Office, 87, Pitt-street, Sydney,
July 17th, 1885.

Dear Mr. Kelly,—In answer to the argument by which Mr. Atkinson endeavours to prove the superior advantages offered by the Equitable Life Assurance Society of New York as compared with the Australian Mutual Provident Society, it will probably be sufficient to point out that the rates of premium charged by the latter at all ages over 45 are actually less than those of the American office. Thus, at age 50 the premium to assure £100 in the Mutual Provident Society is £4 9s. 10d.; while the Equitable rate is £4 14s 4d. At age 55 the respective rates are £5 12s 2d and £5 19s 10d, from which it will be seen that a person assuring at the age of 55 next birthday would get a policy in the A. M. P. Society for £10,684 for the same premium which would assure £10,000 in the Equitable. These are facts which the public can verify for themselves by consulting the prospectuses of the two offices.

Mr. Atkinson has not thought proper to note in his comparison that your assurance was effected in his office some four months before the policy in the A. M. P. Society was taken out, and that there was, as you are aware, a difference in age, one being for 53 years, and the other for 54. The effect of this was to make your annual premium payable to the Equitable Society £27 10s less than it otherwise would have been. When this is taken into account it makes Mr. Atkinson's comparison of what the respective premiums would assure simply nonsense. But even taking the actual premiums paid by you to the two offices it can easily be shown that the net cost of a year's assurance is considerably less in the A. M. P. Society than in the Equitable. Thus, assuming your policy to be for £10,000 in each office, the results will be as follows:—

—	Annual Premium.	Cash Bonus.	Net cost of Assurance.
A. M. P. Society	£587 10 0	£105 0 0	£482 10 0
Equitable Society	542 18 0	50 0 0	492 18 0

It will thus be seen that (Mr. Atkinson's figures notwithstanding) your assurance in the A. M. P. Society costs you £10 8s per annum less than in the Equitable. If Mr. Atkinson can get away from these figures I shall be happy to hear from him.

At our interview I explained that your bonus did not vest until the expiration of two (2) years from the date of the policy—that is to say, you cannot draw the cash value until your policy with us is two years old, but you can draw it from the Equitable at the end of the first year of assurance. But does that circumstance alter the fact that a £10,000 policy in the A. M. P. Society would cost you £10 8s per annum less than in the Equitable? And this is the question that intending policy-holders have to ask themselves in judging of the relative advantages to be derived from the respective offices: Is a cash bonus of £105 on a £10,000 policy in the Mutual Provident, payment of which is deferred a year, more or less advantageous than one of £50 from the Equitable not so deferred? And what has Mr. Atkinson to say to the cash bonuses (double in amount of those in the Equitable) which you will receive each year for perhaps 29 years, after the two (2) years' probation have expired? What will be the relative conditions of the two policies 5 or 10 years hence? As the Equitable Society has assumed the prophetic instinct in regard to tontine policies, perhaps Mr. Atkinson will answer these questions!

Mr. Atkinson's statement that the bonuses on the A. M. P. Society's policy do not vest until the policy has been two years in force is quite true; it is equally true that the Equitable's bonus is not available till the end of one year; but to say that there is any element of tontine in these facts is to force on me one of two conclusions—neither of them is complimentary to Mr. Atkinson, so I refrain from stating them.

And why should Mr. Atkinson complain of the publicity I have given to this matter? Did he not write to the Melbourne Manager of the Equitable Society, expressing the opinion that these results ought to be made widely known, and am I not making them as widely known as I can?

Let it be once for all known that profit in a life office cannot be produced by any feat of legerdemain. Other things being equal, the office which conducts its business at the least expense, and realises on its investments the highest rate of interest, must produce the largest rate of profit. Let us see how the two offices compare in these respects for the year 1884:—

—	Percentage of Expenses on Premiums Received.	Rate of Interest on Invested Funds.
Aust. Mut. Prov. Society	16·9	£6 3 1
Equitable Society	19·9	5 5 7

The interest receipts of the Equitable include "dividends and rents," and the rate is therefore overstated, but I can let that pass and merely add that any business man, with these facts before him, would have known that the Equitable could not possibly allot anything like the rate of bonus declared by the Mutual Provident Society.

Yours faithfully,
MORRICE A. BLACK,
Actuary.

Some of the prominent ADVANTAGES of this undertaking:—

1. The Government railroad, Homebush-Waratah extension of the Great Northern Line, RUNS THROUGH THE PROPERTY FOR A MILE AND A-HALF, AND WILL BE COMPLETED FOR COAL TRAFFIC TO NEWCASTLE WITHIN EIGHT MONTHS.
2. At a depth from the surface of only 96 feet a seam of coal 20 FEET THICK exists, AS PROVED BY THE TRIAL SHAFT.
3. The existence of FIVE OTHER SEAMS of COAL in the Company's property.
4. The excellence of the quality of the coal, as proved by the Government Analyst and the report of Mr. Thomas, the Victorian Government Coal-Viewer at Newcastle.
5. The extensive deepwater frontage. Although Lake Macquarie Heads are not immediately available for shipping, yet there can be no reasonable doubt that in the near future Lake Macquarie will become a shipping port for the mineral produce of the district. The Government have engaged the services of Sir John Coode, the eminent engineer, to report as to the best means of deepening the entrance to the lake.
6. The proximity of the Company's property to that of the celebrated Newcastle-Wallsend Coal Company.
7. THE REASONABLE PROSPECT OF A DIVIDEND WITHIN, SAY, 12 MONTHS FROM COMMENCING OPERATIONS.

TO THE PUBLIC OF SYDNEY and NEW SOUTH WALES.

We beg to inform you that our 19th GREAT SEMI-ANNUAL DRAPERY SALE commenced on Saturday last, August 1, and WILL BE CONTINUED FOR FOURTEEN DAYS from that date.

These REGULAR PERIODICAL SALES have now become so well and favourably known that it might appear superfluous for us to say anything to recommend them; but, seeing that there has been a very large accession of population both in the metropolis and throughout the colony since the time we started this EXCELLENT SYSTEM (now 9 years ago, when we published fully the details of it), we deem it advisable now to state briefly that these SEMI-ANNUAL SALES, occurring in February and August each year, ARE NOT the ordinary Drapers' "Clearing-out at Immense Sacrifice Sales," generally of old-fashioned soiled accumulations, but SPECIAL EFFORTS for two weeks at the close of the Summer and Winter Seasons to reduce a surplusage of BRAN NEW STOCK, consisting principally of HOUSEHOLD DRAPERY, LINEN GOODS, &c., &c., which, from various causes, we get left on hand in our bulk stores. LARGE IMPORTERS OF GOODS cannot help being overstocked with some articles. The course usually adopted is to hold them over to the next winter. WE prefer converting them into cash at once, and order FRESH NEW GOODS to be made for future requirements.

Of course we have to submit to some loss at these SEMI-ANNUAL SALES, but we recoup it partly by not having to pay heavy expenses on the dead stock. As a rule we mark the SURPLUS STOCK at these sales a trifle above ENGLISH MANUFACTURERS' COST PRICE, just to cover shipping charges, and have hitherto had no difficulty in finding ready buyers to clear the whole during the fortnight.

The Sydney Morning Herald.

TUESDAY, AUGUST 4, 1885.

A stranger glancing at our commercial columns during the past month would see that co-operative institutions have a very large development, and if he looked somewhat more closely he would observe that generally these are conducted with an amount of success that is alike creditable to the management and satisfactory to the shareholders. The tendency all the world over is to throw large establishments into the hands of companies. Within three years past we have seen floated into companies here such varied undertakings as joinery-works, ice-making, wool-broking, tobacco-manufacturing, milk-supplying, beer-brewing, wine and spirit selling, powder-making, candle-manufacturing, theatre construction and management, and importing; and, although it is thought that the management of companies is less efficient than that of private firms, there are often compensating advantages in having many proprietors.

Four of the local banking institutions which have lately published their reports, have shown, on the whole, very satisfactory results. The dividends they have yielded have been from 9 to 25 per cent. They have distributed among their shareholders a sum of £134,750, equal to 16·4 per cent. per annum on their paid-up capital, and they have added to their reserves a total of £32,000. With results such as these, after a season admittedly very trying to the commercial, pastoral, and mining classes, shareholders have good reason to be satisfied. They afford fair ground for the growing favour with which the stocks of colonial banks are being received in the London market, where a very considerable advance has taken place in those of the principal issues.

Steamship enterprise within coastal waters has been attended with a fair amount of success, but where the vessels of our leading colonial company come into competition with the fleets of other colonies and of the Empire, the trade has been of an unremunerative character, leaving a loss on the half-year's business: and since to this has been added the loss of the Cahors—the company's finest steamship—the position of the shareholders is not a very enviable one. But if we take a more general view, the experience of the Australasian Steam Navigation Company is not exceptional; for despite the fact that the price of ships has lately been unusually low, the profits they have been earning in all the leading lines of ocean communication have been very small, the business in many cases leaving a loss to the owners. Cheapness of cost has stimulated the supply; and this being in excess of even the largely increasing requirements, has produced the natural depression.

Gaslight companies here, as in England, in Europe, and on the Continent, are among the most flourishing of joint stock enterprises. Whilst the companies generally have paid their customary dividends, ranging from 6 to 15 per cent., most of them have reported decreases in the price of gas. It is found here, as elsewhere, that with the increase of population and increased consumption of gas, lower prices are possible, concurrent with the maintenance of dividends. Consumers are ever demanding reductions, and the expression of public opinion, with the risks of competition, have a salutary influence in checking a natural tendency to excessive charges. If we compare the rates of shareholders' dividends paid by the companies here with those of companies elsewhere, we shall not find them excessive. In England, where capitalists are satisfied with smaller results than are looked for here, the dividends of the leading gas companies range up to 17½ per cent., which is paid by the Hull Gas Company. In America the range is still higher, though owing to the extensive "watering" of the stocks it is difficult to say what exactly are the amounts. The Paris Gas Company pays its shareholders over 30 per cent. per annum. Therefore it would seem that, having regard to the difference in the rates paid for capital here and elsewhere, the Gas Companies do not get excessive returns.

Capital invested in insurance enterprise—fire and marine—where confined to the colonies, has received a fairly profitable return. But attempts in one instance to do business in British waters have resulted in disastrous failure. This is at least the third time in which colonial companies have sought to do English business in London in competition with British companies, and on each occasion the results have been unsatisfactory. English insurance records show that rates in the mother country have been cut down to the very lowest points compatible with a profitable business. Indeed, some unprofitable risks have to be compensated for by others that are good, which enables English companies to thrive. But colonial institutions going to England can only expect to get a larger proportion of the bad than of the good risks; as a rule, colonial companies in the colony command the larger part of the best risks. Local interests will usually command the best results in this as in all other lines.

Co-operative mining enterprise is in some directions only being rewarded with a fair amount of success. The copper-mining companies are passing through a trying season. The low price of copper prevents remunerative results, and the large dividends which formerly were paid are now no longer possible. None of our copper companies has declared a dividend for some time past. The gold reefs and leads have afforded less satisfactory returns to joint-stock enterprise than those of the neighbouring colonies, and our capitalists who favour this form of investment—and there is a considerable number of them—obtain their dividends chiefly from the Victorian and Queensland gold mines. The silver mines at Silverton and Sunny Corner seem to promise more hopeful results, and capitalists are pressing into them with increasing ardour. One good dividend has been paid. Time, however, is needed to show whether the great expectations which are so common in mining enterprises will end in substantial results. There is one form of mining enterprise in operation in New South Wales which rests on an assured basis. The coal companies which have this month declared dividends have had an unusually brisk trade. Indeed, the business has been so active that ships have been delayed long in Newcastle for the want of ability to supply coal. In this view, the opening up of fresh mines in the great coal district of Australia is a matter intimately associated with the colonies' progress.

Most of the other businesses which co-operative enterprise has undertaken to manage and develop in the colony show very satisfactory results. As the general outcome of the operations of some thirty-three companies of various kinds, with a paid-up capital of £3,180,000, half-yearly dividends have been distributed during the past month amounting to about £240,000, being equal to 15·1 per cent. on the paid-up capital. These figures include several companies in course of development which have given no dividends, as well as other companies which have worked at a loss. They are exclusive of other profits which have gone to reserves; but it must be said also that they are profits derived in part from reserve funds and borrowed capital. Nevertheless, they show that enterprise by joint-stock companies has been well rewarded.

The letter from our New York correspondent which we published yesterday throws a cloud over what had appeared to be the brightest spot in the outlook of American politics. In the view of our correspondent the probabilities are that President CLEVELAND will be defeated in his attempt to eliminate the political element from the Civil service, by abolishing the rule that has prevailed so long—"The spoils to the victors." This reform has been pressed upon the country for years past by some of its best men. The vicious influence of the old system has been denounced in no nicely measured terms on the platform and in the press. Other Presidents have nibbled at the question. Mr. CLEVELAND'S predecessor, President ARTHUR, in his first Message to Congress, nearly four years ago, expressed in the plainest way his preference for the English system, with its competitive examinations, its limitation of the maximum age at which applicants may enter so as to prevent the introduction of men of middle life, its tenure of office that is substantially a life tenure. It is true that he objected to a partial adoption of the English system; but he said he would be bound to give his approval to a statute that would incorporate all its essential features. Now we have Mr. CLEVELAND, a man who won his election by his reputation for integrity and firmness, gained during his tenure of office in New York State, entering in a wider province on the work of purification and reform; and the prediction is that he will be deserted by his party, that nothing less than a great wave of public favour could save him, and that he has to fear, not only the opposition of the wire-pullers of the political machine, but the growth of public sentiment in support of a political Civil service.

It is this last item in the forecast which appears to be of the greatest significance. The determined antagonism of the party wire-pullers was to be counted upon as a matter of course. With a non-political Civil service, a great part of their occupation would be gone; and it was not to be expected that they would allow their power to be weakened or destroyed without a struggle. But if it be true that there is growing up amongst the people generally a feeling that they have a natural right to place in the public service, and that a system which saves those places from being scrambled for every few years and on the occasion of every party contest is unjust, we have here an illustration of the demoralising influence which the spoils rule has been exercising upon the community. The idea that a man who wants a lifelong tenure of office must be "a poor-spirited creature," coupled with the doctrine that place in the public service is a part of the political heritage of every citizen, is suggestive. The inference is that the public servant ought not to be a man who will be content with moderate pay for reasonable work, with security as the chief condition of the situation; but that he should be one who prefers a short and insecure tenure, together with the opportunity of "making hay while the sun shines." Our correspondent, referring to such glimpses of the characteristics of a fixed Civil service as English and French novels afford, seems doubtful whether the system introduced by Mr. CLEVELAND will give greater efficiency, or industry, or more politeness than the old one. That is the way, he implies, that people in the United States are beginning to look at the matter. But there are American novels as well as English and French ones, and from some of them we get glimpses of a worse defect in the old system than any lack of politeness, industry, or even efficiency; and it is not from novels only that we derive the impression that the spoils system in the American public service has been a fruitful source of corruption and robbery. And this impression is strongly confirmed by our correspondent's own remarks. If it be the fact that any considerable portion of the people regard the public service, not as a career to which a man may creditably devote his life, but as a business stand which he may profitably occupy for a short time for the purpose of making money or pushing his fortune (and that is what it really comes to), the prospects of healthy reform cannot be bright, for the public mind must have lost perception of the inestimable benefit of official integrity.

Another, and no less discouraging, picture presented by this letter is that of the breakdown of self-government in Boston. Local self-government has often been held up as the preparation and foundation for constitutional government in the whole State; and that there is truth in the well-worn stock arguments to that effect cannot be denied. But experience, in the United States at any rate, has put the principle to a severe trial. What the precise cause of failure, or what the combination of causes may be, it would be impossible for us accurately to point out. In Boston, according to our correspondent, the reason seems to lie in the predominance of the Irish vote. Similar explanations have been offered in New York. But then we are told "Philadelphia is very largely American, and has as bad and corrupt a government as ever cursed a city." But there is a great deal in that remark, "No stream can rise higher than its source." And probably the broadest explanation of the phenomenon will be that when the source of power is with the masses of the people, there must be a low standard of public morality with the masses if that power is corruptly used. It matters not whether a native vote or an alien vote be in the majority, or hold the balance of power, the people cannot be guiltless where the power derived from them is continuously abused. One of the keenest satires upon representative government is to be found in the fact to which our correspondent points, namely, that in New York and Brooklyn it was found necessary to make an absolute despot of the Mayor. Government by the people for the people has, he says in effect, been superseded by a dictatorship tempered by Lynch law. There are many problems yet to be worked out in the world's history, and the perfectibility of representative government is one of them. The late PRINCE CONSORT incurred some odium by hinting as much a quarter of a century ago. The experience gained by mankind since then has not shown that he was in error.

The members of the Land and Industrial Conference are united only on the subject of the Land Act. On the subject of political economy they hold a variety of opinions. One of the speakers declared that in two years' time, at the furthest, protection will be established in this colony; but it is clear that some of the most influential men in the Conference will endeavour to prevent the fulfilment of the prophecy. At the session on Saturday, a couple of the speakers ruthlessly shattered some of the illusions of the protectionists. It is the constant assertion of these people that if there were a protective duty on imports, iron and other manufacturing industries would spring up on every hand, and become increasingly prosperous. Mr. W. M. FOOTE, however, challenged this hypothesis, and in a vigorous speech pointed out that the failure of the iron industries in this colony was not due to the want of a protective policy. "The great causes of the failure," he alleged, "were ignorance, bungling stupidity, and mismanagement;" and, further, that no amount of protection would make such industries as the Fitzroy and Lithgow ironworks pay, "not even if a protective duty of 50 per cent. was placed upon iron." Mr. CLEMASHAW followed in the same strain, and added that "Mr. FOOTE'S remarks with reference to the ironworks would apply also to other industries." "If they became protectionists," he also said, "it would be impossible for them to interchange their commodities for those elsewhere." It is refreshing to hear such sensible talk proceed from a conference that was in danger of becoming the laughing-stock of the community. The criticisms of the two gentlemen referred to are true; that is to say, it is true that no practicable amount of protection would make either the Lithgow or the Fitzroy ironworks a success, if superior skill and the best modern appliances were not used in the development of the industries. And apparently a measured amount of protection is of no value to some of the manufacturers. Some weeks ago the iron manufacturers interviewed Mr. WRIGHT, and informed him that they had resolved to send in a combined tender for the manufacture of the iron flumes required for the Sydney water supply if he would promise to give them a little special encouragement. The MINISTER intimated that if their tender were 10 or 12 per cent. above the English tenders he would accept it. When the tender came in, however, it was found to be so greatly in excess of the price quoted by English manufacturers that he could not entertain it. With a bonus of 10 per cent. the local iron manufacturers ought to be able to compete against the world. That they cannot do so proves that there is a large amount of truth in the criticisms of Mr. FOOTE.

The New Zealand Assembly has resolved to continue the Pacific Mail Service, and to pay an annual subsidy of £30,000 towards its support. But this resolution has been passed on the condition that the company make that colony the terminus for their steamers. It is to be regretted that the Assembly has insisted upon this condition. Experience of mail services in the colonies generally ought to have taught them that such a policy is a mistake. Some years ago Victoria attempted something similar. She made a contract with the P. and O. Company, and arranged that Hobson's Bay should be the terminus for the steamers. But the arrangement was not a success; and even if we had not been impelled thereby to establish the Pacific service, it would probably have been abandoned before the contract period had expired. The Victorian Government discovered that it was a matter of comparative indifference whether the terminus of the P. and O. steamers was in Hobson's Bay or Port Jackson. When the Pacific service was started New Zealand insisted that the steamers of the company should call at the principal ports in the colony. It was supposed that the ports would reap some substantial gain from such an arrangement. But the people soon saw that that was an illusory notion, and so the practice was abandoned. Heedless of the past, New Zealand is now shaping a policy which is likely to be a failure. Unless the Pacific Mail Company are allowed the privilege of bringing their steamers on to Sydney, it is improbable that they will make a contract with New Zealand. We infer so much from the fact that when New Zealand, a few months ago, claimed its right to all the postages received by the Australian colonies for the transmission of letters by the company's steamers, and to the subsidy payable by this colony, declaring at the same time that she would arrange with the company, a well-founded report was put into circulation that at the expiration of the contract the steamers would be withdrawn from the trade. If the Pacific Company were to accept what the New Zealand Assembly has approved, they would certainly lose much of their present revenue for the carriage of goods to Australia. As a subsidy of £30,000 would not compensate for this loss, the company would hardly be willing to make a contract with that colony. Moreover, if passengers from Australia have to change steamers on their arrival at Auckland, the probability is that this branch of the traffic will be considerably less than it has been hitherto. For her own sake, therefore, and also for ours, it is to be hoped that New Zealand will modify its proposals.

NEWS OF THE DAY.

ACCORDING to our cable news this morning, Louis Riel, the leader of the late rebellion in the north-western provinces of Canada, has been sentenced to be hanged for high treason.

THE Agent-General, we are informed, has not, as was intimated in one of our cable messages yesterday, purchased on behalf of this colony a vessel called the Lioness for use as a training ship, and we learn that there has been no intention on the part of the Government to purchase any vessel to be so used; but in view of the Vernon, as that vessel increases in age, becoming unsuitable for her present work as an industrial school ship, the Government through the Agent-General have been endeavouring to ascertain whether the Imperial authorities have at their disposal a vessel that would answer this purpose, and yesterday the Colonial Secretary received a cable message to the effect that, under certain conditions, the iron troopship Simoom was available. This vessel is 3302 tons and 1576 horse power, and appears to be regarded by Sir Saul Samuel as very suitable for the duties that would be required of her; and in his telegram to the Colonial Secretary he asks whether he shall forward an estimate of the cost of fitting up the vessel and sending her out to the colony. The vessel, if approved of here, will have to be purchased from the Imperial Government, and the expense of bringing her out to Sydney will have to be borne by the colony. In the event of the Government purchasing the vessel the engines would be taken out in England, and the ship would come here under sail, but the matter, we understand, will remain in abeyance until the exact condition of the Vernon has been ascertained, and it has been clearly shown that another vessel is required to take her place.

A TELEGRAM has been received by the Colonial Secretary from Sir Saul Samuel, stating that the steamer Belgic sailed from London for Sydney on the 30th ultimo with 590 immigrants, equal to 516 adults, and including 180 single women, on board.

IN March last the Agent-General was instructed by the Government to endeavour to purchase in England a lioness for the Sydney Zoological Gardens, and according to a telegram received, Sir Saul Samuel has succeeded in purchasing an animal of the kind required.

THE parade of troops to be held on Saturday, the 15th instant, will be one of the most imposing displays yet afforded by the movements of the local forces. The troops which will take part in it include the Permanent Artillery, Engineers, Torpedo Corps, the 1st, 2nd, 3rd, and 4th Regiments of Infantry, Naval Brigade, Naval Artillery Volunteers, and field batteries of Permanent Artillery, Volunteer Artillery, and the Naval Brigade. There probably will be over 4000 men in the field. The paid portion of the country corps will be brought in, but the reserves will not be put under orders, as their clothing is not ready. As the parade is on a Saturday, the school cadets, if it were considered advisable, could be turned out, and might assist in keeping the ground. The parade will be held in Moore Park, which will be so fully occupied by the troops that very little space can be allowed for the public inside the fence. It is understood at present that the proceedings will consist of a review and march-past, but as the authorities will have at their disposal exceptionally good materials for interesting movements, it is possible that the operations may be extended. Details will be published on an early date.

THE Brigade Office authorities have completed their arrangements for the establishments of the reserve corps in the south, and during this week those corps, 18 in number, will be complete, and instructors provided. In the north-western districts the corps have received a share of the instructors' attention. There are several detachments not yet found, owing to their isolated position, which entails a waste of time and labour on the part of an instructor, but the wants of these detachments are receiving attention. It may reasonably be supposed that many of the reserve corps will be able to receive their rifles very soon after the review of the 15th, and their complete arming will probably take place, simultaneously with the issue of the Martini-Henry rifles recently obtained in England. The question of the clothing of the reserves is under consideration.

IT is in contemplation, we believe, to officially open the Great Western Railway extension to Bourke on the 3rd September, but the matter was not up to yesterday quite decided.

THE Government have accepted the tender of the Horseley Co., London, for the supply of large pipes for that portion of the Nepean water supply works which lies between Sydney and Granville. Tenders for the supply of these pipes were invited in this colony as well as in England, and nine colonial tenders were received, in addition to 19 English ones, but it was found that the colonial tenders were in amount so much above those which came from England, that the Minister for Works had no alternative but to accept one of the latter. The amount of the successful tender is £40,570, the quantity of pipes to be supplied is 4290 tons, and the contract is to be completed within 12 months. The pipes, which are to be of wrought-iron, will be 6 feet in diameter, and are intended to span the depression known as Duck Creek Valley, a length of 4¼ miles. When laid they will bring the full capacity of the aqueducts from Prospect—that is, 50,000,000 gallons of water per day—to Potts Hill, a distance of about 13 miles from Sydney, and from that point there will be laid 4-feet pipes, which will deliver 17,000,000 gallons per day at Crown-street. This last-mentioned quantity can be doubled by simply laying down another line of 4-feet pipes. The riveting-up of the 6-feet pipes is to be done in the colony.

THE Full Court was occupied nearly all yesterday in considering a motion for a rule nisi for a new trial in the case of M'Combie v. Bennett and another. The action, which was one tried during last sitting before Mr. Justice Windeyer, was brought by the plaintiff, a hotelkeeper, against the defendants, for publishing an alleged libel in their newspaper commenting upon the sanitary condition of his premises, and attributing an outbreak of smallpox in the locality to the filthy state in which, according to the article complained of, they were kept. The rule was granted, on the ground that the presiding Judge refused to admit certain evidence. The remarks of the Bench, which were of considerable importance, will be found in our law report. His Honor the Primary Judge heard the conclusion of the arguments in the suit Allen v. Gilroy, which was brought for specific performance of a contract to sell 200 acres of selected land, and to transfer 440 acres of adjoining land if selected. The judgment was reserved. The suit Readford and wife v. Callaghan and others was dismissed with costs between attorney and client, the plaintiff having admitted that he found three-fourths of the money wherewith William Turley brought his suit against the same defendant trustees of his father's will, which suit was dismissed by his Honor Mr. Justice Faucett, when Acting Primary Judge, principally on the ground that the accounts of the trustees, which were questioned, had been seen by the plaintiff 20 years ago, and he had not brought his suit within reasonable time. His Honor remarked that he would use the provision in the Act enabling him to award costs between attorney and client, more than he had hitherto done to check unjust and unnecessary litigation.

YESTERDAY an impression was abroad that the Government had suddenly stopped the issue from the Government Printing Office of the land regulations, with the intention of issuing new ones, and it was supposed that arising out of this the Government intended to postpone the lands office day. On inquiring at the Lands Department we learned that a new edition of the regulations with an index had been prepared, and had been ready for issue, but it was then ascertained from the Department of Mines that the timber regulations were to be thoroughly revised, and as it was evident that the moment these revised timber regulations were published the new issue of the land regulations would be imperfect, it was thought advisable to withhold the new publication until the revised timber regulations were ready. The pamphlet containing the land regulations already issued was still available to the public, and it was the intention, should any inconvenience arise from withholding the new publication, to issue the new edition without regard to the proposal to amend the timber regulations. The new edition of the land regulations will not contain anything relating specially to the Act or the regulations different from what is to be found in the first edition; the only new features in it are an index and a map showing the territorial divisions and the land board districts. No decision has been arrived at with reference to a postponement of the lands office day, but a deputation on the subject is to wait upon the Minister for Lands at half-past 2 this afternoon.

A COUNTRY resident has written to us, commenting on several points in the exercise of the powers of land boards under the new Land Act. His remarks, based on the proceedings of the first land board meeting held at Casino, are directed against the assumption by the board that, in fulfilling its mission of settling the people on the land, its decisions were not governed by any hard-and-fast rules, but would be guided by the bona-fides of the parties concerned. Our correspondent puts the question whether the Act is not so explicit as to the function of land boards, that the assumption of such freedom of action is quite unwarrantable. "The mere shadowing forth of the possession of such a power," he observes, "is dangerous, and opens up a view of which it is not pleasant to contemplate the possible termination." He attacks the procedure of the Casino Board in reversing a forfeiture without, as he alleges, taking evidence on behalf of the Government as to the grounds of forfeiture. If such things can be done, he urges, there can be no finality; and decisions of forfeiture or approval may be liable to reversal according to the view any board may take regarding its powers and functions. He asks how far back this power of reversal is to extend, and thinks that "land boards will be tempted to exalt their office and aim at powers which the Legislature never intended them to possess; or, like ignorant magistrates, give decisions guided by their own crude ideas of what the laws ought to have been, and not by the laws they are appointed to administer."

YESTERDAY afternoon a preliminary meeting of American citizens was held at the U. S. Consulate offices, Spring-street, for the purpose of taking steps to place on record their appreciation of the life and public services of the late General Grant. The proceedings were brief, and consisted of the appointment of a committee to organise the movement. The gentlemen selected are to meet this evening, at the Royal Hotel, George-street, with a view to taking further steps in the matter. It was announced that Bishop Barry had expressed his hearty approval of the movement; and a letter was read from the Hon. W. B. Dalley, in which the writer with pleasure accepted an invitation to be present on the occasion of the demonstration.

THE steamship Suez, of Messrs. Gibb, Livingstone, and Co.'s line, arrived in port on Friday last, from Hongkong, with passengers and cargo, and left again for Melbourne on Sunday morning. During the time she was in port nine of the Chinese crew deserted, and yesterday Messrs. Burns, Philp, and Co., the agents of the vessel in this city, had to pay the sum of £90 into the Custom House, being £10 poll tax for each man, in accordance with the provisions of the Chinese Restriction Act.

CAPTAIN TUPIE reports that the missionary barque John Williams reached Tahiti on the 1st May, 37 days from Sydney. The vessel had to contend against S.E. and N.E. winds, with a sharp, though not a violent, head sea right down to the harbour of Papeate. The handrails were carried away, and several sails torn to pieces. The Rev. W. E. Richards and Mrs. Richards, missionary passengers, were well. They were landed on Raratea, and received a hearty welcome from the people. The outstations of the Society Islands belonging to the London Missionary Society were visited, and the work was completed by the 19th of June. The vessel sailed for the next group of islands to the westward of Tahiti, and the captain expected to be at Mangnia on the 23rd June. The dengue, or New Caledonian fever, was running its course in the group, and Captain Turpie, Mrs. Turpie, with several of the crew, had suffered from it.

A NEW industry which is of considerable magnitude, and is likely to be of importance to the colony, has been started by the Soda Crystals Company in Regent-street, almost immediately opposite Messrs. Hudson Bros.' works. The manufacture is that of soda crystals, and the materials used are alkali and salt cake. The latter is produced in the colony, and in consequence of the establishment of the new industry it has obtained a value it did not hitherto possess, manufacturing chemists generally discarding it as useless. The two materials are mixed in their proper proportions, and are boiled in a large tank until they become a coffee-coloured liquid. They are then drawn off into a 10-ton tank to settle and are afterwards syphoned into a series of shallow pans, each of which contains 16cwt. In these they remain for seven days, during which time the crystallisation takes place; and when this is completed the crystals are dug out, and having been dried and bleached by simple exposure to the air for two days they are packed in barrels and are ready for the market. A small quantity of the liquor will not crystallise, and this is returned to the boiler, and with the addition of more salt cake it is used again. In their marketable state the crystals are bright and clear. It is claimed also that they are stronger than the English product, the liquor used being of greater density, and that they are equally pure, while they are offered for sale at rates considerably below those demanded for the imported article. In addition to this advantage, another is offered as regards weight. The soda sent from England, the company states, loses from 5 to 10 per cent. in leakage or evaporation. Purchasers of the locally-produced article are given a full 20cwt. to the ton.

A FINE sample of sugar canes received by Messrs. Gibbs, Bright, and Co., from the Chatsworth Estate, Clarence River, is being exhibited in Exchange room. It is of the Bourbon variety, and the canes are about 12 feet in length.

MR. COCHLAN'S *diamond drill* completed a bore very expeditiously on the Woronora, George's River, on Saturday last, August 1, having gone down 1003 feet in 67 days. The fastest work done was between the depth of 846 and 1003 feet, when a depth of 156 feet was bored in six days, or an average of 26 feet per day. The boring operations were carried on during the day-time only, and with one shift of men.

ON Saturday, the 25th ultimo, a man named Charles Flood left Sydney to visit some friends at Windsor, and nothing further was heard of him until last Friday, when his body was found floating in the Yarramundi Creek, near Windsor. An inquest was held at Windsor, but there was no evidence to show how the deceased got into the water, and an open verdict of "Found drowned" was recorded. The deceased was a married man, a saddler by trade, and resided at 36, Cumberland-street.

IN another column will be found some particulars concerning the elaborate new premises for the Young Men's Christian Association, at the intersection of Pitt-street and Bathurst-street, which are now approaching completion. When erected they will have cost (inclusive of £13,000 paid for the site) not less than £33,000 or £34,000.

THE representatives of the Land and Industrial Alliance and other similar organisations dealt at their sitting yesterday with the question of the desirableness of amending the mining laws, and passed a resolution in favour of the formation of a political union, to consist of farmers, manufacturers, miners, and the industrial classes. It was stated that the object of the union was the return, at the forthcoming general election, of candidates favourable to the abolition of the Land Act, and the adoption of payment of members; and that in districts where there was a general feeling in favour of protection, the adoption of that principle should be an additional qualification. The conference then went into committee. This afternoon a deputation from it will wait upon the Minister for Lands.

A COMPLIMENTARY banquet was tendered last night, at Aaron's Exchange Hotel, by the employes of Victoria House (Messrs. Farmer and Co.) to Mr. R. Venn Brown, on his departure from the colony to represent the firm in Europe. The chair was occupied by Mr. John Pope, who had on his right the guest (Mr. Venn Brown) and on his left Mr. Norman, while the vice-chair was filled by Mr. Seaward, supported on the right by Mr. John Clark, and on the left by Mr. Gard. The chairman read a letter of apology for non-attendance from Mr. Ben. Grice. The toast of the evening was proposed by Mr. John Pope, who highly eulogised Mr. Brown for his earnest attention and assiduity to all matters concerning Victoria House. The toast was drunk with enthusiasm. Mr. Brown returned thanks in appropriate language. The chairman then handed to him an address, beautifully finished by Mr. Fletcher Watson, and asked his acceptance of it as a souvenir of the staff's good wishes "The Firm," including Mr. Wm. Farmer, was proposed by Mr. John Clark, the chairman and vice suitably responding. Other toasts, including "The Employes," proposed by Mr. Seaward, and responded to by Messrs. Seymours and Taylor, were given, and the company broke up, after spending a very pleasant evening.

ON Saturday evening last the Lord Wolseley Military Lodge of Good Templars, in connection with the New South Wales Artillery and Volunteer Forces, held its usual quarterly meeting in the Presbyterian schoolroom, Kent-street; the lodge as usual being well attended by visitors from sister lodges. After the routine business of the lodge had been transacted the election of officers for the ensuing quarter took place with the following results:—Quartermaster-Sergeant M'Millan, W.C.T.; Mr. Whitten, W.V.T.; Sergeant Percy, W. Secretary; Brigade Quartermaster-sergeant M. Webster, W. Treasurer; Gunner Thwaite, W.F.S.; Gunner Radburne, W. Chaplain; Gunner Taylor, W.M.; Gunner Whitten, W. Sentry; Gunner Hibbit, W.G. The installation ceremony was performed by Brother Ritchie, W.J.D., and the usual vote of thanks to the visitors brought the proceedings to a termination.

YESTERDAY afternoon a well attended meeting was held at the Royal Hotel, to make the necessary arrangements for carrying out the next annual ball in aid of the funds of St. Vincent's Hospital. Amongst those present were Mr. John Toohey (chairman), Dr. M. J. Clune, Messrs. H. Austin, J. T. Toohey, W. Edmunds, G. Hurley, J. B. Despointes, A. Kirby, R. Farrell, and A. J. Brady. The hon. treasurer (Mr. H. Austin) placed before the meeting his balance-sheet for the last ball, which showed a net profit of £555 3s. 7d. The report was adopted, and it was decided that the next ball should be held in the Exhibition Building on the 23rd September next. Messrs. A. J. Brady and W. H. M'Carthy were appointed hon. secretaries, and Mr. H. Austin hon. treasurer. The meeting then adjourned till Tuesday next, at 4.30 p.m.

THE adjourned meeting of the Eastern Suburbs Working Men's Club and Literary Institute was held in St. Mark's Schoolroom, Darling Point, last evening, the chair being occupied by Mr. J. R. Fairfax. There were present also the Rev. Ernest Wootton, curate in charge, and the Rev. J. D. Langley, incumbent of St. Philip's, Sydney. The schoolroom was fairly well filled with intending members. The minutes of the previous meeting having been read and confirmed, the election of office-bearers was proceeded with, with the following result:—President, Mr. J. R. Fairfax; vice-presidents, Messrs. G. R. Wise, E. Prosser, and T. Ridley; secretary, Mr. Carlton L. Boyce; treasurer, Mr. Aaron Maclean; librarian, Mr. Hugh Mortimore; committee, Messrs. E. Wootton, Cowie, Maclean, Porter, Elliott, Sledge, jun., Roberts, Mortimore, and Charlesworth. It was decided to re-commit the proposed rules, and deal with them at the meeting to be held on Monday evening next.

IN the Benevolent Asylum, Pitt-street South, there is a girl named Eliza Manale, nine years of age, who was found in Hay-street on the 28th ultimo, and handed to the police. The child says that she came here from Orange on the above date, with a Mrs. M'Kenzie, whom she lost in George-street, and that her parents are newly resident at Orange. Strange to say nothing has been heard of Mrs. M'Kenzie. The child is dressed in a black and red check pattern frock, and a hat trimmed with velvet and pearl beads. The police have communicated with Orange, and are doing their utmost to find the child's parents. The only clue at present is the statement by the child that her father is a waiter.

A SHOCKING accident occurred to a man named John Dunn, a labourer, aged 41, yesterday morning. Dunn, who resides at Burwood-road, Burwood, and has only been in the colony about four months, was employed on the Northern line of railway between Homebush and the Parramatta River. It seems that two empty trucks, to which were attached a couple of horses, were on the metals, and in the first of them Dunn was standing. Suddenly the horses started forward, and the man was thrown out, with the result that one of the wheels passed over both of his legs, inflicting serious injuries. He was conveyed to the Sydney Hospital as quickly as possible, and admitted by Dr. Richard Westrum. On being examined it was ascertained that he had received a compound fracture of the left leg. His right leg was badly lacerated; and in addition he was suffering greatly from shock. Amputation of the left leg was deemed advisable, but the patient withheld his consent, consequently the operation was not performed.

A "PRACTICAL WORKER" writes to the *Brisbane Courier*:—"We are not only to pray but to 'lift up the hands which hang down and the feeble knees' of those whom we love. Let us see to it that we have ready for them on returning from the day's engagements a basin of strong nourishing beef-tea or other household stimulant; an egg well beaten, with a little nutmeg or ginger and milk: strong coffee; or, if preferred, good fruit—oranges are specially useful; or ginger beer, &c., according to taste. See that these matters are not left to servants, but have them at hand yourself. We may all look for a blessing if we add to our prayers our loving efforts."

THE supporters of the Licensing Bill now before the Victorian Parliament will be gratified to learn (says the *Age*) that a very decided demonstration in favour of the measure has been made by one of the leading trades organisations in the colony. It will be seen on refer-

ence to our reports of trades meeting that at a largely attended meeting of the implement and machine makers a discussion arose with regard to the Licensing Bill. It was mentioned that there was a probability of the Licensed Victuallers' Association appealing to the Trades Hall Council to join them in the effort to prevent the measure from being passed, and the meeting thereupon passed a resolution instructing the delegates representing their society on the council to use their utmost endeavours to prevent any such alliance, as they considered that the new Licensing Bill would be "one of the greatest boons ever given to the working-classes by the Parliament of Victoria."

The Wellington correspondent of the *N. Z. Herald*, writing on July 24, says:—"The debate on the 'Frisco service attracted a large House and a great number of the public. Sir George Grey made a very good speech in favour of the continuance of the service, which evidently had weight. The first division, taken at midnight on the technical point to report progress, was defeated by 16 to 54. The second division on Mr. Sutter's amendment resulted in £30,000 being retained in the motion, and the proposal to make the subsidy by mail matter was rejected. The numbers were 43 against 31. A third division on Mr. Pyke's amendment to make the American Government pay one-third of the subsidy resulted in its defeat by 50 to 24. Three years' period was accepted by the Ministry instead of five."

Mr. C. W. Langtree, the Secretary for Mines in Victoria, has (says the *Age*) issued his quarterly report of the mining registrars for the quarter ended 30th June. In the first quarter of the year a large decrease in the yield of gold was shown, and a still further decrease for the second quarter has now to be recorded. The decrease for the past quarter is 7300oz., chiefly from the alluvial mines in the Creswick, Maryborough, Majorca, Avoca, and Indigo districts. From quartz-mining, on the other hand, there has been an increased yield in several divisions, notably in the central division of the Ballarat district. The total yield for the three months ending 30th June was 185,037oz. 15dwt. 10gr. The area of auriferous ground actually worked upon is returned as 314½ square miles, about the same as in the previous quarter. The mining population is estimated at 27,479, and the value of the machinery employed on the goldfields is estimated at £1,906,285. The deepest shaft in Victoria is the Magdala, at Stawell, being 2409 feet; while Lansell's 180 mine, at Sandhurst, comes next with 2041 feet.

The following is the report of the Sydney Hospital for the week ended 1st August, 1885:—Admitted, 29 males, 12 females, total 41; discharged, 27 males, 20 females, total 47; died, 2 males, 2 females, total 4; remaining, 124 males, 51 females, total 175; casualties treated but not admitted, 43.

The Social Purity Society announces a lecture to-night in the Protestant Hall. It will be delivered by the Rev. C. Olden, who has undertaken to show that the present law for the protection of young women is grossly inadequate, and that there is a direct connection between the present unprotected state of womanhood and the abounding vice and immorality of Sydney. The Most Rev. the Primate will preside.

We are requested to intimate that an error has occurred in connection with the date advertised for the lecture on the Kindergarten system of instruction by Mrs. A. C. Crowley. The lecture will be delivered in the School of Arts, Pitt-street, on Thursday evening next.

In the list of new magistrates published in the *Herald* last Friday, the name Thornton, Philip Thane, appears instead of Thane, Philip Thornton.

A public meeting of the Catholic clergy and laity of the Archdiocese of Sydney is to be held at St. Mary's Cathedral on Thursday evening next, at 8 o'clock, for the purpose of expressing thanks to the Pope for the elevation of the Archbishop of Sydney to the Cardinalate.

We are requested to notify that a short course of lessons in practical nursing, for ladies, is advertised to be given at the Home for Nurses by Miss Parker, the matron. The proper methods of treating patients will be shown; and, as the classes must be small, ladies who purpose attending should send in their names at once.

THE OMNIBUS DRIVERS' STRIKE IN MELBOURNE.

[By Telegraph.]

(From our own Correspondent.)

MELBOURNE, Monday.

The strike of the omnibus drivers was continued today, when only 17 non-union men did duty. Over 200 of the men on strike met at the Trades' Hall in the forenoon to agitate for the adoption of the eight hours' system, a leisure Sunday once a fortnight, and the reinstatement of the men who are supposed to have been discharged by the company as a measure of retaliation against the union. The directors of the company have issued a manifesto to the public declaring that the men work only 10 hours daily on each day of the week, which is less than in any other city in the world. The men agreed to wait on the directors in the afternoon, which was done by a deputation, and the directors offered to concede to a certain extent by establishing a system of working for eight trips each day, with occasionally two or three men doing seven or nine trips, and arranging the shifts so that the men would get about five hours daily to themselves, and to be paid at a certain price per trip. The men held a meeting in the evening, and unanimously resolved to hold out against the terms offered. Amongst the speakers at the meeting were two clergymen, who supported the demands of the drivers. The men who went on driving to-day were hooted by the larrikins and the cabmen, and in some cases were stoned.

VICTORIA.

MELBOURNE, Monday.

The Melbourne Chamber of Commerce to-day agreed to support the Bills of Lading Bill, now before the Legislative Council, making it a misdemeanour to sign or negotiate a bill of lading, knowing that the goods referred to therein have not been shipped, nor are at the port of shipment, nor loading.

The remaining six of the Queenscliff mutineers were tried by court-martial to-day, when Mr. M'Kean attempted to appear for them, but was not allowed. The men cross-examined the witnesses, particularly as to whether any explanation of what constituted the offence of mutiny had ever been given to the men; and the witnesses admitted that the offence had not been explained to the men. The accused also handed in written statements for their defence. The finding of the Court will be forwarded to the Minister of Defence, and will be announced in due course.

The University Council to-day agreed to make the minimum salary of their professors £750 per annum, with £100 as house allowance. The question as to whether a periodical increase should be given to Professor Tucker was allowed to stand over for the present.

The medical students of the University have taken the entire gallery of the Theatre Royal to-morrow to see the "Colleen Bawn" performed.

The manager of the National Bank has written to the Chief Commissioner of Police, thanking the detectives who so speedily brought the robbers of the Simpson's-road branch to justice. The commissioner will nominate a board to distribute the reward, which, as only £400 out of £1125 stolen has been recovered, will be under the sum of £550, that had been promised.

The Southern Insurance, Indemnity Insurance, and Australasian Plateglass Insurance Companies have each declared a dividend at the rate of 10 per cent. The Coffee Tavern Company also declared a 10 per cent. dividend.

At an adjourned meeting of squatters in the Western district of New South Wales, held to-day to consider the rabbit question, a resolution was adopted declaring the only way to deal with the pest was by the erection of rabbit-proof fences, which the Government should undertake, the squatters paying 4 per cent. on the cost. A committee was appointed to draw up a petition to the New South Wales Parliament on the matter. The fences are estimated to cost £40 to £52 per mile.

The half-yearly meeting of the Commercial Bank was held to-day, when a dividend at the rate of 10 per cent. was declared, and the sum of £25,000 added to the reserve fund. A branch of the bank has been opened at Brisbane.

The Railway Commissioners have opened a class for teaching telegraphy, and no stationmaster or porter in charge will be appointed until he has obtained a certificate of competency in the class.

A miner named Cromwell committed suicide at Maryborough by cutting his throat. He had been treated unsuccessfully for cancer, and did the deed in despair.

QUEENSLAND.

BRISBANE, Monday.

A deputation from the residents of Gladstone waited on the Treasurer this morning to urge that the construction of the railway between Gladstone and Bundaberg be immediately proceeded with. Mr. Dickson said that the Government were fully alive to the importance of a coastal line of railway throughout the colony, the early initiation of which was not the least important part of the Ministerial programme. Personally, he believed in urging on the proposed work with all speed, but he advised them to see the Minister of Works on the subject.

The Government steamer Advance, lately engaged in the defence service at Thursday Island, will shortly be handed over to the Harbour and Rivers Department for use as a pilot boat for Cape Moreton.

A kanaka was scalded to death at Bundaberg on Friday by falling in a clarifier containing boiling juice, at the Windsor Mill. Another kanaka had both his arms fearfully crushed by getting them between the rollers at the Sommerville Mill. Both arms had to be amputated.

A new Masonic lodge named the General Gordon was consecrated here to-day. The ceremonies were followed by a banquet and a concert and ball, all of which were very successful. A number of visiting brethren were present.

The following are the latest Charters Towers crushings:—The Wyndham Tribute Company have crushed 84 tons of stone for a yield of 104oz. of gold; Mossman's Eastward Ho! Company, 220 tons of stone for 1540oz.; Woolgar River Company, 504oz.

At a social meeting held at the Wesleyan Church this evening, a prolonged conversation took place regarding the desirability of establishing a Wesleyan Collegiate school in this colony. A resolution was unanimously carried that the time had arrived for the establishment of such a school, and a committee was appointed to carry the resolution into effect. A subscription list was opened for the purchase of a suitable site, and nearly £2000 was promised in the room. The Rev. J. A. Nolan, President of the Conference, was in the chair.

The weather is unsettled, and occasional showers have fallen.

The Rev. Mr. Turnbull, the head of the Christian Crusaders, was presented with a purse of sovereigns and an address this evening.

Mr. G. A. Sala's second lecture, on "Dickens and Thackeray," was well attended to-night.

TASMANIA.

HOBART, Monday.

The debate on the Financial Statement begins in the Legislative Assembly to-morrow, and it will probably be prolonged, as a belief exists that the deficiency in the revenue is greater than it has been made to appear.

The steamer Sikh, which arrived here on Saturday, 58 days out from London, brings a large quantity of arms and ammunition. She will sail for Melbourne to-morrow, and thence to Sydney.

A man who has given various names, the last being, Golding, has succeeded in getting money from several of the legal firms here, by representing himself as entitled to property. He was arrested at Campbelltown while on his way to Launceston on Saturday.

Pulpit Rock, one of the sights of the Upper Derwent was partially destroyed by a blast on Saturday, in connection with the works of the Derwent Valley Railway.

It is proposed to have a permanent force of 90 men to look after the machine guns and artillery.

TEMPESTUOUS VOYAGE OF THE STEAMER AIRLIE.

[By Telegraph.]

(From our own Correspondent.)

MELBOURNE, Monday.

The steamer Airlie, which arrived here from Foochow to-day with a cargo of tea, met with very severe weather, and lost several of her boats. Captain Ellis reports that in passing through the China Seas the vessel fell in with the end of a tremendous typhoon, lasting several hours; and at one time it was feared that the vessel would not last it out. Five out of the six boats on board were washed out of the davits, the main hatches were sprung open and lifted a considerable distance in the air, falling some feet away. The cargo was well protected by tarpaulins, and no damage is estimated.

FATAL RAILWAY ACCIDENT NEAR GUNDAGAI.

[By Telegraph.]

(From our own Correspondent.)

GUNDAGAI, Monday.

News has just reached town that a frightful accident occurred on the Gundagai railway at the Coolac crossing this morning. It appears that several thousand sheep, in passing over the line, caused the ballast to fill up the space between the rails and the wooden guard, and the contractor's engine, with several trucks, ran off the line at that place. It is stated that the guard, a man named Fisher, was killed, and another man was seriously injured. No further particulars are to hand as yet.

COUNTRY NEWS.

NEWCASTLE, Monday.

The steamer Namoi did not reach here this morning till 9 o'clock, on account of a fog which prevailed.

A Seamen's Union is to be formally established at the Protestant Hall to-morrow night.

The annual meeting of the Northumberland Permanent Building Society was held at Waratah last Friday night, Mr. R. Turton, J.P., occupied the chair. The reports and balance-sheet, which were adopted unanimously, showed a state of great prosperity. Messrs. H. Winchester and T. Abel were elected directors, and Messrs. J. Bedford and G. Buckley auditors. There was a large attendance of shareholders.

GRAFTON, Monday.

A slight shower of rain fell here this evening.

WISEMAN'S FERRY, Monday.

An inquest was held at noon to-day on the body of Archie M'Donald, who was killed last Saturday night by falling down stairs at Mr. Thomas Preston's residence, and a verdict was returned of accidental death by falling down stairs.

CASINO, Monday.

At a public meeting held here on Saturday night, the Mayor in the chair, the following resolution was unanimously adopted, on the motion of Alderman Pyers, seconded by Mr. Cope:—"That this meeting learns with extreme satisfaction the decision of the Government to request Sir John Coode to inspect and report as to the best method of improving the entrance to the Richmond River, and have great pleasure in endorsing such action, which is clearly indicative of a desire on their part to fulfil the promises made by the members of the Ministry that this important work should be dealt with." Alderman Page moved, and Mr. W. Hindmarsh seconded,—"That the thanks of this meeting are hereby cordially accorded to Mr. John See, M.L.A., for having successfully brought the claim of the Richmond River to a report upon its harbour improvements before the Government, whereby Sir John Coode has been requested to inspect and report upon such an important work." This resolution was carried unanimously. It was decided to telegraph the resolutions to the Minister for Works, and also to Mr. See. The fact of the Government having decided upon such a course has given great satisfaction in this district.

Messrs. F. G. Crouch, C. E. Crommelin, W. Hindmarsh, and R. Pyers, were sworn in to-day by Judge Murray, as magistrates.

The weather is still dry and cold.

FERNMOUNT, Monday.

Under the auspices of the Progress Committee a very large and influential public meeting was held here on Saturday last to consider what further steps should be taken to obtain the improvement of the bar or entrance to the river. After several speakers had addressed the meeting, a resolution was carried to the effect that the Government be requested to get Sir John Coode to visit the district and report upon the best means of permanently improving the entrance to the Bellinger River. A further motion was adopted that the foregoing resolution should be forwarded by telegraph to Mr. R. B. Smith, the member for the district, for presentation to the Government.

TAREE, Monday.

At a public meeting held in the Agricultural Hall, Taree, on Friday evening last, for the purpose of petitioning the Minister for Works, through the local members, to remove the dredge from where she is now working to the lower part of the river, so as to clear a passage through the narrows, which, on account of the shallowness of the water, causes a considerable impediment to navigation, Mr. T. W. Dugdale, J.P., presided, and there was a good attendance. It was resolved to take the necessary steps to accomplish the object without delay.

On Saturday evening about 100 members of the Manning River Hewers' Union met in the Protestant Hall, Taree, for the purpose of adopting the rules and regulations of the society. The objects of the society are to unite for their mutual interests, and to secure a uniform rate of payment per foot for work done. The president, vice-president, treasurer, secretary, and committee were elected.

A fatal accident occurred on Saturday last to a young man about 18 years of age, a son of Mr. Robert Murray, of Clarkson's Crossing. He was watching a large tree which was being cut down, and when it fell he was unable to get out of the way in time, but was caught by one of the large limbs and nearly buried in the ground. His body was fearfully mangled, and it was found necessary to saw the limb asunder and dig out the remains before they could be extricated.

Great satisfaction is felt in this district at the action of the Government in getting Sir John Coode to report on the state of the Northern harbours and rivers with a view to their improvement; and it is hoped that the result will be that some feasible plan will be proposed for permanently improving the entrance to the Manning River.

ARMIDALE, Monday.

A carter named James O'Dell died suddenly here on Saturday. He had been somewhat unwell for a couple of days previously.

In his sermon yesterday, Bishop Turner made reference to the approaching hospital ball. He stated that he considered such charity was of a spurious kind.

The weather is fine.

QUIRINDI, Monday.

Mr. Tanko's store at Wallabadah was burnt to the ground early this morning, nothing having been saved. Three boys who were sleeping in the building had a narrow escape from being burnt to death. The premises and stock were insured for £1000.

BOURKE, Monday.

A large supply of fresh water has been struck in a shaft and also in a bore at a depth of 440 feet on Wangamana Station, Messrs. Broatch and Co. owners, 75 miles on the Wanaaring-road. Four miles south there is a Government bore, which has been put down 270 feet and abandoned without striking water. The success of the Wangamana bore should induce the Government to persevere in sinking to greater depths, as water is badly wanted on the Wanaaring-road, a great number of cattle from Queensland having been driven south by the drought.

The weather is warm, and rain is badly wanted.

The river is low.

ORANGE, Monday.

A fatal accident occurred yesterday to a farmer named Curtis, residing about six miles from Orange. Curtis was harnessing a young horse to a springcart, and shortly afterwards his wife saw the animal galloping away. On going to see what was the matter she found her husband lying senseless on the ground. A doctor was summoned, who discovered that several of the man's ribs were broken, and the neck dislocated. Life was extinct. The coroner dispensed with an inquest.

Severe frosts are prevalent in this district.

BATHURST, Monday.

The annual meeting of the School Teachers' Mutual Improvement Association was held on Saturday, at the Superior Public school, Mr. D. S. Hicks, district inspector, in the chair, and there was a large attendance of ladies and gentlemen. The report as read showed the total enrolment of members to be 104, and that the meetings during the year had been, as a rule, well attended, and the objects of the society, so far, had been fulfilled. The chairman referred to the High schools, which, he said, were now fairly successful both as regards attendance and economical management. During the proceedings a lecture was delivered on the principles of chemistry by Mr. W. J. C. Cross, lecturer to the Board of Education, for which he was accorded a vote of thanks. The following gentlemen were elected as office-bearers:—President, Mr. D. S. Hicks, District Inspector of Schools; vice-presidents, Messrs. Detturans and Farr; committee, Messrs. C. L. Street, F. Hatley, Boyd, J. Cook, W. J. Holmes, L. Price, and S. Bidwell; hon. secretary and treasurer, Mr. G. Wenholz.

A meeting of Roman Catholic laymen, in connection with the testimonial to Dr. Byrne, was held yesterday at the Guild Hall, Mr. John Meagher in the chair. It was stated that the fund in this parish now amounted to £420. Relative to the consecration ceremony, this will be conducted by the Bishop of Maitland, assisted by the Bishops of Goulburn and Armidale.

BLAYNEY, Monday.

Mr. Wooley, an overseer engaged by Messrs. Robertson and Co., at this end of the Blayney-Murrumburrah railway, died suddenly yesterday afternoon while returning from Mandurama to Carcoar.

The nomination of candidates to fill the vacancy in the local borough council, caused by the retirement of Alderman Palmer took place to-day. Messrs. Liebert, Woolley, and Beddie were duly nominated.

BLAYNEY, Monday.

Great progress is being made in the construction of the new junction line. Last week the wages amounted to over £12,000.

The weather is still very cold and wintry, with severe frosts at night, and medium mild days. Rain is badly wanted.

TEMORA, Monday.

The business of the District Court was finished here today before Judge Forbes. The cases heard were of no public importance.

ALBURY, Monday.

By an extraordinary accident at a sawmill, a lad named Trebley, about 10 years of age, the son of a man employed in Dunsbrell's sawmills, had a miraculous escape from death. He was watching the machinery in motion, and incautiously approaching too near was caught by the belt and carried completely round before the accident was observed and the engine stopped. The lad was much cut and bruised all over, and covered with blood, but was not dangerously injured.

THE TURF.

A meeting of members of Tattersall's Club was held last evening at Tattersall's, when the settling took place over the late Canterbury Park meeting. The following were the amounts paid to the winners:—Mr. W. Kelso, £337; Mr. E. E. Cornwell, £79; Mr. W. H. Kent, £20; and Mr. D. Lawson, £10; total, £446. The general settling followed, and passed off satisfactorily. Several disputed cases and complaints were investigated by the committee.

The following are the latest scratchings:—Melbourne Cup: Hazard, Garfield, Archie, Burrilda, Nepicallina, and First Demon. Caulfield Cup: First Demon. Hawkesbury Handicap: First Demon.

Liverpool was backed for the Melbourne Cup yesterday at 1000 to 30.

VICTORIAN RACING CLUB.

MELBOURNE, Monday.

The annual meeting of the Victorian Racing Club was held to-day, when the balance-sheet was adopted, and the old Committee re-elected. The gratuity to the widow of the late Judge Johnston was increased to £250. The secretary, Mr Byron Moore, explained that it had not been attempted to put down cash betting, the club having only abolished the numbered posts on the Hill used as bookmakers' stands. Cash betting was not illegal, except at places construed to mean business establishments.

THE VICTORIAN TURF.

MELBOURNE, Monday.

First Demon has been struck out of the Caulfield Cup.

The wagering on the Melbourne Cup and Derby was brisk to-day. For the Derby, 1000 to 80 was taken about Dunlop and Thunderbolt, and the same price was wanted. Nordenfeldt and Newstead were well supported at 5 to 1, and closed at 9 to 2. Liverpool came into prominence for the Cup at 1000 to 20 booked, and 1000 to 30 wanted. Coronet was in demand at 100 to 5, but the layers would not give more than 100 to 6. For the double—the Derby and Cup—Dunlop and Coronet were backed to win £25,000 at 1000 to 5, and 100 to 8 is wanted about Newstead and Coronet. For the Caulfield Cup Welcome Jack was backed for £3000 at 100 to 7, and subsequently for the same amount at 50 to 1. Hurricane was befriended to the extent of 1000 to 30, and 1000 to 40 was the best offer at the close. Achmet was backed for the Derby at 50 to 1 for £2000.

THE JUNIOR CRICKET ASSOCIATION.

The annual meeting of the delegates of the Junior Cricket Association was held at the Cambridge Club Hotel last evening. There was a large attendance and Mr. J. Beveridge occupied the chair. Before proceeding to the formal business of the evening a letter was read from Mr. F. A. Cubitt, in which that gentleman signified his intention of presenting two five guinea trophies to the association for competition during the ensuing season. Mr. R. C. Beveridge moved the following resolution,—"That the name of the association be changed to the Sydney Cricket Association." After a brief explanation on the part of the mover, the resolution was negatived, it failing to find a seconder. The honorary secretary (Mr. L. G. Abrams) then read the annual report and balance-sheet which, with some slight alterations, were on the motion of Mr. J. Clayton adopted. "The junior cricketers of this colony, having long felt the want of a proper organisation for the conduct of their matches, the representatives of 21 of the leading junior clubs, at the request of Mr. Lewis G. Abrams, Carlbona C. C., met in the Post Office Hotel on 15th May, 1884, to consider how this end could be best attained. Representatives of the various clubs at this meeting formally agreed to form a junior cricket association. To make the necessary arrangements, a working committee was appointed, consisting of Messrs. John Beveridge, H. G. Curnow, T. Brewitt, W. Moyes, R. A. Warren, H. H. Mayo, and Lewis G. Abrams. This committee held various meetings, and drew up a code of bylaws forming the constitution of the association and a series of cup conditions, all of which were in the main approved of at the general meeting of the delegates on 29th July, 1884. During the course of the season only three protests were entered, and these were promptly decided by the committee in a satisfactory manner. Mainly through the exertions of Mr. J. Beveridge the committee were able to secure the Agricultural Ground for cup matches, and to arrange the match at Ashfield, between Shaw's eleven and 18 members of the association—a match, which may yet be productive of results, scarce thought of, inasmuch as for the first time in the cricket history of the metropolis players from clubs outside the New South Wales Cricket Association were able to try conclusions with an All England Eleven, and showed that the committee had exercised the greatest care in their selection. The performances of the majority of the 18 were of a high character, notably those of Messrs. Spurway, Tindall, Forris, and Luland. That the interest in the Junior Cup contests, under the management of the association, continued unabated is proved by the large attendances which witnessed the final matches. It is most gratifying to the committee to have to state that while the gate charge is the same for both the Association and the Agricultural Grounds, the cricket-loving public thronged to see the Junior Cup contests in the way they did. The committee have pleasure in stating that the Agricultural wickets and the two former wickets on Moore Park have been secured for the cup contests of season 1885-86, when the cup and medals, presented by Mr. H. M'Quade, M.L.A., Windsor, will be competed for. The balance-sheet of the treasurer shows—Receipts, £241 1s. 3d.; expenditure, £208 18s. 3d.; leaving a balance at the credit of the association in the Commercial Bank of £32 3s., a result which is eminently satisfactory. The association is under a deep debt of gratitude to the various donors of the trophies, competed for under its auspices, notably:—Silver cup and gold medals, presented by Messrs. Peapes and Shaw, and won by the Surry United C. C.; Vice-presidents' Consolation Trophy, won by Osborne C. C. The committee wish to remind the association how much they owe to the unwearied and indefatigable efforts of the hon. secretary, Mr. Lewis G. Abrams, the founder of the association, and who, during the past season, has so freely and ungrudgingly devoted all his leisure to the furthering of its interests. In conclusion, the committee wish to congratulate the association on the great improvement in junior cricket during the past season, and would also thank the press for the careful reports of all their doings." The election of office-bearers for the ensuing year resulted as follows:—Patron, the Mayor of Sydney; presidents, the Hon. E. Barton, and Mr. H. M'Quade, M.L.A.; vice-presidents, Sir G. Innes, Messrs. A. Cameron, P. B. Walker, Stedman, Hilder, F. A. Cubitt, and A. H. Moore. Mr. L. G. Abrams was unanimously re-elected hon. secretary, the chairman eulogising that gentleman for his untiring energy and uniform attention. Mr. Abrams suitably responded. Mr. J. Beveridge was unanimously appointed hon. treasurer. Committee, Messrs. J. H. Clayton, Curnow, Warren, M'Kern, Ironside; auditors, Messrs. Gosnell and Hibble. Before the meeting terminated, it was decided to vote the sum of £5 5s. towards a testimonial to be presented to Mr. L. Abrams. The chairman announced that Mr. Harry A. Solomon had promised to place five guineas at the disposal of the association for trophies for the ensuing season.

FOOTBALL.

The following team has been chosen by the selection committee to represent the New South Wales Rugby Union in the coming intercolonial football matches at Brisbane:—Back, Tiley; half-backs, Creer, Robberds, and Lloyd; quarter-backs, Harris, Flynn, Doyle; forwards, Walters, Warren, O'Donnell, Ford, Ford, Graham, Smith, E. Smith, Cameron, Fligg.

HUNTING.

One of the most successful meets that has taken place in the Parramatta district for some years was that of Saturday last in connection with the County of Cumberland and Northern Hunt Clubs. The attendance was very numerous, and amongst others included Mr. E. Terry on Butcher Boy, Miss Terry on Zoe, and Mr. J. M. Toohey on Monte Carlos. A hare had been provided for the hunt, but the person to whose care puss had been entrusted managed to let her escape, and a drag had, therefore, to be substituted. The Northern hounds led off at a great pace, and were soon in full cry. Shortly after the start one of the most valuable dogs in the pack was ridden over by a horseman, and killed. The first jump was a stiff one, and caused several of the huntsmen and followers to "go round," while the thick bush and big fence subsequently encountered gave trouble to numbers. At the next double Conrad fell, shaking his rider (Mr. Cosgrove) pretty severely. The horse recovered himself, and tore away across the country with the hounds at at his heels, and a check had to be made. After a short respite another start was made, and this time the drag led across Wentworthville, where several stiff jumps had to be negotiated, a three-railer at the end proving too much for The Agent, who gave his rider a severe fall. After another mile or so had been covered, a second check took place, and the meet concluded with a run across country home. The Country Club's hounds will throw off at Campbelltown, and the Northern Hunt Club's at Ryde on Wednesday.

Our Newcastle correspondent telegraphs that a wrestling match took place at the Lyceum, late City Hall, on Saturday night, for £40 a-side, between M'Caffery, from the United States, and Chas. Hawkins, of Newcastle. The match resulted in a draw, owing to one of Hawkin's arms having been disabled. Each man secured one fall in the Græco-Roman style.

We learn by telegraph from our West Maitland correspondent that a match was made last night between S. A. Fitzgerald and R. Campbell, to pull in best and best boats for £50 a-side, to take place at Morpeth on September 5.

Our Quirindi correspondent telegraphs that great interest prevails locally as to the result of the Sheffield Handicap. The town is full of strangers, and beds are unprocurable already. Most of the runners are on the ground, and there is a fair share of betting going on.

We learn by telegraph from Armidale that the local club defeated the Glen Innes players in the lawn tennis matches on Saturday, winning 45 games to 31.

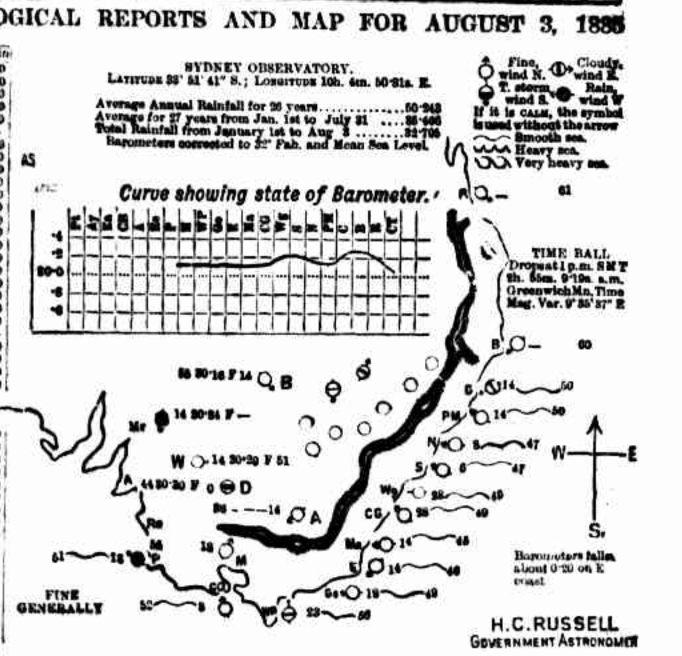

Our Mudgee correspondent telegraphs that a football match was played there on Saturday, between teams from the Bathurst and Mudgee clubs. The game was a fast one all through, the teams being well matched. Bathurst got the first try after a few minutes' play, and Mudgee scored two points by a good run by Flanagan. After half-time, neither side scored, though Bathurst had a try for a goal under protest, and the result was a draw. The visitors were entertained at a banquet in the evening at Daly's Hotel.

SYDNEY OBSERVATORY.
Latitude 33° 51' 41" S.; Longitude 10h. 4m. 50·81s. E.

Average Annual Rainfall for 26 years .... 50·243
Average for 27 years from Jan. 1st to July 31 .... 28·466
Total Rainfall from January 1st to Aug 3 .... 32·706
Barometers corrected to 32° Fah. and Mean Sea Level.

NOTES EXPLANATORY OF MAP.

In the list of stations the column headed W.T. gives the state of the weather at 9 a.m., b standing for blue sky; c, detached clouds; d, drizzling rain; f, fog; g, gloomy; h, hazy; m, misty; n, frosty; o, overcast; p, passing showers; r, rain; s, snow; t, thunder; u, threatening. The next column, Mx gives the maximum temperature for previous 24 hours. Mn the corresponding minimum temperature; r'n the rain for the previous 24 hours. The symbols used in the map are explained on the margin. At each coast station the wind symbol is placed like a vane pointing to the direction from which the wind is coming. A clear circle with it means fine weather; a circle with bar, cloudy weather; and a black spot, raining. Next to this symbol are placed figures denoting the number of miles the wind is moving per hour; next, a symbol showing the state of the sea; and, lastly, figures denoting the shade temperature at 9 a.m. The barometer curve shows the state of barometers round the coast from Perth to Cooktown:—Pt, Perth; Ay, Albany; Ea, Eucla, CB, Cape Borda; A, Adelaide; Ro, Robe; P, Portland; M, Melbourne; W P, Wilson's Promontory; Go, Gabo; E, Eden; Ma, Moruya; CG, Jervis Bay; Wg, Wollongong; S, Sydney; N, Newcastle; P M, Port Macquarie; C, Clarence River; B, Brisbane; R, Rockhampton; Ct, Cooktown; Menindie, Mf. Inland the state of barometer is given in figures at Albury, Deniliquin, Wentworth, Bourke, and Alice Springs. The barometer curve enables one at a glance to trace the depressions, beginning in Western Australia, and passing along eastwards; northerly winds preceding them, and southerly following.

South Australia.—Fine generally, foggy in places; very light rain here and there inland to Bimbam; westerly winds about Adelaide. Telegrams too late for map.

Victoria.—Generally cloudy, fine at Melbourne and Cape Otway, light rain falling at Portland; smooth sea, falling barometers, and light northerly winds on coast; rainfall, Portland 0·02, Wilson's Promontory 0·01.

Tasmania.—Dull on N. coast, with fresh E. wind and falling barometer. No rain reported.

New Zealand.—Russell, barometer 29·60, wind N.W., fine; Wellington, barometer 29·70, wind S.E. strong, rain 0·43; Bluff, barometer 30·00, wind S.E., showery.

New South Wales.—Generally fine and clear, with light N.W. to S.W. winds and calms and falling barometers. Smooth sea, falling barometers, light westerly winds, and very clear weather on coast. No rain. Cloudy in places on western slopes of mountains; for details see map. Showery at 9 a.m. at Menindie, but none recorded. Gabo Island reports a sharp shock of earthquake, S. to N., lasting 50 seconds, on Sunday, 2nd instant, at 12.58 a.m.

Queensland.—Generally fine on E. coast; sea moderate; winds, S.E. and S.W. Rain: Brisbane, 0·02; Cape Moreton, 0·29; and Cooktown, 0·56.

3 P.M. OBSERVATIONS.

Victoria.—Melbourne, N.N.W., 13, cloudy but fine, temperature 62°; Cape Otway, W.N.W., 13, squally, moderate sea, temperature 59°; Portland, W., 23, fine but cloudy, smooth sea, temperature 57°; Wilson's Promontory, W., 34, cloudy, moderate sea, temperature 56°.

New South Wales.—Albury, calm, cloudy, temperature 52°; Clarence River, N.E., 14, fine, moderate sea, temperature 66°; Cape St. George, calm, fine, moderate sea, temperature 60°; Deniliquin, N.W., dull, temperature 60°; Dubbo, calm, fine, temperature 55°; Eden, E., 14, fine, slight sea, temperature 56°; Forbes, calm, fine, temperature 52°; Goulburn, N.W., fine, temperature 53°; Menindie, calm, fine, temperature 60°; Moruya, N.E., 14, fine, moderate sea, temperature 57°; Newcastle, S., 8, fine, moderate, temperature 60°; Port Macquarie, N.E., 14, fine, smooth sea, temperature 66°; Sydney, E.W.E., 8, fine, smooth sea, temperature 59°; Wentworth, W., fine, temperature 58°.

STATE OF RIVERS.

Murrumbidgee: At Hay, 1 foot 6 inches above summer level; at Balranald, 2 feet 4 inches above summer level. Murray: At Albury, 1 foot 5 inches above summer level. TOWN OF BOURKE, N. S. W.
SPLENDID OPPORTUNITY to PUBLICANS, INVESTORS, and others.

For Private Sale, or to be sold by Auction, about the Opening of the Railway to Bourke in September next.

The following valuable Freehold Properties:—
That well-known and high class Hotel known as the Turf Hotel, Mitchell-street, Bourke, at present in the occupation of the owner, Mr. Edward Warmoll, having a frontage of 33 feet with depth of 166 feet, quite new, and faithfully built of brick, with iron roof of two stories, containing 2 dining-rooms, 3 parlours, 18 bedrooms, billiard-room, offices, large storeroom, bathrooms, kitchen, &c.; balcony, 42 feet by 14. A large livery-stable adjoins the hotel.
The above has been in the occupation of the owner for the last two years, is doing a large, remunerative, and increasing trade, and is situated in one of the busiest parts of the town. The desire of the proprietor to retire from the publican's business is the only cause of its being placed in the market for sale; and it will afford a most lucrative investment to any person desirous of doing a first-class and paying business.

Also,
Half-acre in Darling-street, containing wooden house of 9 rooms and wooden house of 4 rooms, both let to respectable tenants; also, small house of 2 rooms.
Quarter-acre in Oxley-street, facing the Courthouse, with large brick store of 2 rooms; one cottage of 2 rooms of wood; and two cottages built of iron, all at present let at remunerative rents.
Quarter-acre in Oxley-street, fronting Post-office, with house of 4 rooms of wood and brick, kitchen, detached, let to respectable tenant.

Also,
22 suburban allotments, containing from half an acre to one acre each.
The above town allotments are all situate in the principal streets of the prosperous and rapidly increasing town of Bourke, and would be a first-class investment for capitalists, investors, and others.

Also,
For Private SALE, at Cobar, an Hotel, built of brick, containing 18 rooms, stabling, &c., at present let at a rental of £5 per week for five years.

Full particulars, terms, &c., can be obtained on application to the undersigned.

NEW DISCOVERY of GOLD-BEARING QUARTZ REEFS, on the East Coast, Coromandel, New Zealand, on a Block of Land known as Matamatu, Hurakeke, comprising 2700 Acres, having sea frontage of 6 miles and easy access.
The BLOCK is for SALE.
It is heavily timbered, and about half open country (no kauri), numerous creeks and water-power. It is 40 miles from Auckland.
Unlike the Thames or Coromandel gold-fields on the west side of the peninsula, where many drives are put in to find a reef, here, on the East Coast, the reefs run right through the block and are discernible from the surface, and can be traced two and three miles. These are found every few hundred yards, running north and south. Some scrapings from the surface of five of them have been tested by the Colonial Analyst:—
"No. 1 Bullion, 1oz. 15dwt. 22gr. per ton.
No. 2 Bullion, 2oz. 7dwt. 15gr. per ton.
No. 3 Bullion, 2oz. 18dwt. 19gr. per ton.
No. 4 Bullion, 3oz. 15dwt. 2gr. per ton.
"J. H. POND, Colonial Analyst."
"No. 5 Reef: Yield 4oz. to the ton, and by assay, at the Bank of New Zealand, 32oz. 15dwt. 8gr. of gold to the ton. (Signed) A. KAY, pro Manager."
This grand auriferous block is only four miles from the celebrated Tokatea, and is for sale on the following terms and conditions, viz.:—Price, if purchased by Syndicate, £6000, of which £3000 cash will be required, £2000 in paid-up shares, and £2000 may remain at 6 per cent. for three years.
The gold is extremely fine, but with La Monte's process all the gold and silver would be saved.
The seller would take £6000 out and out, or would reduce the amount to £5000 on reservation or royalty of 1s. per ounce on gold and 3d. on silver; and further reduced to £4000, if additional reservation or royalty of 1s. per ton on coals, hematite, or manganese.
